The New Governance Of The English Regions:

The New Governance of the English Regions M. Sandford, 2005-11-22 English regions appeared to have been killed off by the massive no vote in the referendum in the North East on 4 November 2004. By contrast this book analyzes the many institutions and networks established at the English regional tier since 1997. It argues that a new form of governance is developing in the English regions characterized by processes rather than specific policy concerns: strategic co-ordination, scrutiny and civic engagement. *Devolution, Regionalism and Regional Development* Jonathan Bradbury, 2007-12-18 Devolution, Regionalism and Regional Development provides an overview and critical perspective on the impact of devolution on regionalism in the UK since 1999, taking a research-based look at issues central to the development of regionalism, politics, governance and planning. This multidisciplinary book is written by academics from the fields of geography, economics, town planning, public policy, management, public administration, politics and sociology, with a final chapter by Patrick Le Gales putting the research findings into a theoretical context. This will be an important book for those researching and studying economic and political geography and planning as well as those involved in regional development. **The Oxford Handbook of British Politics** Matthew Flinders, 2009-07-16 The Oxford Handbook of British Politics provides the most sophisticated and up-to-date analysis of British politics to date. Essential for all those working in the area. **Devolution and British Politics** Michael O'Neill, 2014-05-22 Devolution has transformed the British Polity in the last decade. Taking this profound change as its theme, *Devolution and British Politics* is an up-to-date, comprehensive and effective review of the origins and development of the devolution process. *Devolution in British Politics* offers a de-centralised assessment of British politics and encourages critical thinking regarding contemporary political theory. **Devolution and Localism in England** David M. Smith, Enid Wistrich, 2016-04-22 Combining historical and policy study with empirical research from a qualitative study of regional elites, this book offers an original and timely insight into the progress of devolution of governance in England. With particular interest in how governments have tried and continue to engage English people in sub-national democratic processes while dealing with the realities of governance, it uses in-depth interviews with key figures from three English regions to get the inside view of how these processes are seen by the regional and local political, administrative, business and voluntary sector elites who have to make policies work in practice. Tracing the development of decentralisation policies through regional policies up to and including the general election in 2010 and the radical shift away from regionalism to localism by the new Coalition Government thereafter, the authors look in detail at some of the key policies of the incumbent Coalition Government such as City Regions and Localism and their implementation. Finally, they consider the implications of the existing situation and speculate on possible issues for the future. **Strategic Planning for Regional Development in the UK**, *Power and Space* John Allen, 2024-08-05 *Power and Space* sets out the inherently spatial nature of power today and seeks to change the conversation around how power exercises us in the contemporary moment.

The essays brought together in this book are a response to the fact that conventional descriptions of power and its ordered geographies no longer chime with our lived experience. Spatiality matters to the workings of power nowadays and this book sheds light on what it is that we face when power is exercised through more subtle spatially nuanced arrangements. It is divided into three parts each representing a different kind of engagement with power's relationship to space from the spatial shifts in the way power is exercised through to its assemblage like entanglements and in turn its progressive topological character. Throughout the book a wide range of social, political and economic examples are drawn upon to illustrate a more provisional sense of power ranging for instance from the seductive logic of privatized public spaces to the attempt by a data analytics company to manipulate political behaviour through to the offshore spaces invented by rising financial elites to challenge the established banking order. Illustrating the new found abilities of the powerful to make their presence felt, this book provides an accessible account of the practical workings of power in the present day. It will be invaluable to students and academics in human geography and urban studies as well as politics, sociology and cultural studies.

The State of the Nations 2001 Alan Trench, 2001. This text charts the asymmetry and instability of New Labour's constitutional settlement and records changes in public attitudes and national identity. The book covers Scotland, Wales, Northern Ireland, England, intergovernmental regions, Westminster and the London assembly. It covers the second year of devolution in the UK bringing together the work of a five year research programme funded by the Leverhulme Trust. The programme comprises 11 research projects that bring out the dynamics of devolution.

'Whither regional studies?' Andy Pike, 2013-09-13. Regional studies are at a vibrant conjuncture. Regions continue to provide a conceptual and analytical focus for often overlapping concerns with economic, social, political, cultural and ecological change. In the context of increased interest in inter and multi disciplinary approaches, regions remain an arena in which synthesis across disciplines, economics, geography, planning, politics and sociology can take place. Yet recent work has raised fundamental questions about how we think about and research regions and regional change, development, governance and regulation. First emergent conceptual ideas have introduced new thinking about space, place and scale that interprets regions as unbounded relational spaces. This work has disturbed notions of regions as bounded territories and questioned hierarchical systems of scale through more complex, multi scalar approaches. Second, research methodology has grown in sophistication and sensitivity but remains somewhat polarised between the binaries of positivist, often quantitative and more theoretically diverse, typically qualitative approaches. Last, regional governance, policy and politics are wrestling with the conceptual, methodological and political complexities of new modes and geographies of governance and emergent multi agent and multi level institutional architectures. This book brings together important voices in regional studies to contribute to and reflect upon these current issues and debates. While we are at an early stage in beginning to think through what such conceptual, theoretical, methodological, governance, policy and political innovations and developments mean for regional studies, the magnitude and resonance of such issues underpin the

vitality of research on the region This book was published as a special issue of *Regional Studies* *Constitutional Policy and Territorial Politics in the UK* Jonathan Bradbury, 2021-01-21 This is the first of a major two volume work which provides an authoritative account of devolution in the UK since the initial settlement under New Labour in 1997 This first volume meets the need for a comprehensive UK wide analysis of the formative years of devolution from the years 1997 to 2007 offering a rigorous and theoretically innovative re examination of the period that traces territorial politics from initial settlements in Scotland and Wales and the Good Friday agreement in Northern Ireland to early maturity Bradbury reviews the trajectory and influencing factors of devolution and its subsequent impacts using a novel framework to set a significant new agenda for thinking and research on devolution
