 breakthroughs in AI technology machine learning and deep learning as seen in self driving cars Netflix recommendations and
 more The future is here Self driving cars are on the streets an algorithm gives you movie and TV recommendations IBM's
 Watson triumphed on Jeopardy over puny human brains computer programs can be trained to play Atari games But how do
 all these things work In this book Sean Gerrish offers an engaging and accessible overview of the breakthroughs in artificial
 intelligence and machine learning that have made today's machines so smart Gerrish outlines some of the key ideas that
 enable intelligent machines to perceive and interact with the world He describes the software architecture that allows self
 driving cars to stay on the road and to navigate crowded urban environments the million dollar Netflix competition for a
 better recommendation engine which had an unexpected ending and how programmers trained computers to perform certain
 behaviors by offering them treats as if they were training a dog He explains how artificial neural networks enable computers
 to perceive the world and to play Atari video games better than humans He explains Watson's famous victory on Jeopardy
 and he looks at how computers play games describing AlphaGo and Deep Blue which beat reigning world champions at the
 strategy games of Go and chess Computers have not yet mastered everything however Gerrish outlines the difficulties in
 creating intelligent agents that can successfully play video games like StarCraft that have evaded solution at least for now
 Gerrish weaves the stories behind these breakthroughs into the narrative introducing readers to many of the researchers
 involved and keeping technical details to a minimum Science and technology buffs will find this book an essential guide to a
 future in which machines can outsmart people **Cuban Music from A to Z** Helio Orovio, 2004-03-12 The definitive guide
