Hooks in Popular Music Tim Byron,Jadey O'Regan,2022-11-22 This volume is the first book length study of hooks in popular music Hooks those memorable musical moments for listeners such as a riff or catchy melodic phrase are arguably the guiding principle of much modern popular music The concept of the hook involves aspects of melody rhythm harmony production lyrical and cultural meaning and how these interact within a song s topline and backing track Hooks are also inherently related to the human capacities for memory and attention and interact with our previous experiences with music Understanding hooks in popular music requires a new interdisciplinary approach drawing from popular music studies pop musicology and music psychology and this book draws from each of these disciplines to understand the hooks present in a broad range of popular music styles from the last thirty years Essays on the Song Cycle and on Defining the Field
,2022-07-18 This volume assembles twelve interdisciplinary essays that were originally presented at the Second International Conference on Word and Music Studies at Ann Arbor MI in 1999 a conference organized by the International Association for Word and Music Studies WMA The contributions to this volume focus on two centres of interest The first deals with general issues of literature and music relations from culturalist historical reception aesthetic and cognitive points of view It covers issues such as conceptual problems in devising transdisciplinary histories of both arts cultural functions of opera as a means of reflecting postcolonial national identity the problem of verbalizing musical experience in nineteenth century aesthetics and of understanding reception processes triggered by musicalized fiction The second centre of interest deals with a specific genre of vocal music as an obvious area of word and music interaction namely the song cycle As a musico literary genre the song cycle not only permits explorations of relations between text and music in individual songs but also raises the question if and to what extent words and or music contribute to creating a larger unity beyond the limits of single songs Elucidating both of these issues with stimulating diversity the essays in this section highlight classic nineteenth and twentieth century song cycles by Franz Schubert Robert Schumann Hugo Wolf Richard Strauss and Benjamin Britten and also include the discussion of a modern successor of the song cycle the concept album as part of today s popular culture *Doing the Time Warp* Sarah Taylor Ellis,2022-01-27 *Doing the Time Warp* explores how song and dance sites of aesthetic difference in the musical can warp time and enable marginalized and semi marginalized fans to imagine different ways of being in the world While the musical is a bastion of mainstream theatrical culture it also supports a fan culture of outsiders who dream themselves into being in the strange liminal timespaces of its musical numbers Through analysing musicals of stage and screen ranging from *Rent* to *Ragtime* *Glee* to *Taylor Mac s A 24 Decade History of Popular Music* Sarah Taylor Ellis investigates how alienated subjects find moments of coherence and connection in musical theatre s imaginaries of song and dance Exploring an array of archival work and live performance such as Larry Gelbart s papers in the UCLA Performing Arts

Collections and the shadowcast performances of Los Angeles's *Sins of the Flesh* Doing the Time Warp probes the politics of musicals and consider how the genre's strange temporalities can point towards new futurities for identities and communities in difference
