Body, Sound and Space in Music and Beyond: Multimodal Explorations Clemens Wöllner, 2017-04-07 Body and space refer to vital and interrelated dimensions in the experience of sounds and music Sounds have an overwhelming impact on feelings of bodily presence and inform us about the space we experience Even in situations where visual information is artificial or blurred such as in virtual environments or certain genres of film and computer games sounds may shape our perceptions and lead to surprising new experiences This book discusses recent developments in a range of interdisciplinary fields taking into account the rapidly changing ways of experiencing sounds and music the consequences for how we engage with sonic events in daily life and the technological advancements that offer insights into state of the art methods and future perspectives Topics range from the pleasures of being locked into the beat of the music perception action coupling and bodily resonance and affordances of musical instruments to neural processing and cross modal experiences of space and pitch Applications of these findings are discussed for movement sonification room acoustics networked performance and for the spatial coordination of movements in dance computer gaming and interactive artistic installations

Participatory Sound Art Vadim Keylin, 2023-11-20 This book addresses a major gap in sound art scholarship the role of audience participation It offers a survey of participatory sound art from its origins in the historical avant gardes to the non institutionalized forms of sonic creativity in contemporary digital culture In doing so it proposes an innovative theoretical framework for analysing such phenomena rooted in Pragmatist aesthetics affordance theory and postcritique Combining artwork analyses with qualitative studies it focuses on three

principal aspects of participatory sound art the ways the materialities of the artworks facilitate and structure the participatory processes the interplay of the creative agencies of the artists and the participants and the postcritical approach to sound art s politics unfolding through the participants affective gestures In considering these multiple dimensions this book contributes to the growing fields of sound studies and participation studies as well as to curatorial practice regarding sound art and participatory art *The Bloomsbury Handbook of Sound Art* Sanne Krogh Groth,Holger Schulze,2020-02-20

The Bloomsbury Handbook of Sound Art explores and delineates what Sound Art is in the 21st century Sound artworks today embody the contemporary and transcultural trends towards the post apocalyptic a wide sensorial spectrum of sonic imaginaries as well as the decolonization and deinstitutionalization around the making of sound Within the areas of musicology art history and later sound studies Sound Art has evolved at least since the 1980s into a turbulent field of academic critique and aesthetic analysis Summoning artists researchers curators and critics this volume takes note of and reflects the most recent shifts and drifts in Sound Art rooted in sonic histories and implying future trajectories *Loading the Silence: Australian Sound Art in the Post-Digital Age* Linda Ioanna Kouvaras,2016-05-13

The experimentalist phenomenon of noise as constituting art in much twentieth century music paradoxically reached its zenith in Cage s silent piece 4 33 But much post 1970s musical endeavour with an experimentalist telos collectively known as sound art has displayed a postmodern need to load modernism s degree zero After contextualizing experimentalism from its inception in the early twentieth century Dr Linda Kouvaras s *Loading the Silence Australian Sound Art in the Post Digital Age* explores the ways in which selected sound art works demonstrate creatively how sound is embedded within local national gendered and historical environments Taking Australian music as its primary but not sole focus the book not only covers discussions of technological advancement but also engages with aesthetic standpoints through numerous interviews theoretical developments analysis and cultural milieux for a contemporary Australian and wider postmodern context Developing new methodologies for synergies between musicology and cultural studies the book uncovers a new post postmodern aesthetic trajectory which Kouvaras locates as developing over the past two decades the altermodern Australian sound art is here put firmly on the map of international debates about contemporary music providing a standard reference and valuable resource for practitioners in the artform music critics scholars and educators **Art Scents** Larry Shiner,2020-02-11

In the last twenty years there has been a marked increase in artists using smells in their works at the same time that scents are being used to accompany plays films and music There is also an increase in ambient scenting in stores and hotels and leading chefs are adding unusual scents to cuisine The book explores these olfactory activities and the aesthetic and ethical issues they raise as well as answering the traditional disparagement of the sense of smell by leading intellectuals such as Kant Darwin and Freud drawing on current science social science and humanities as well as literature **Papers of the Society of Painters in Tempera** Society of Mural Decorators and Painters in Tempera, London,1928 *Catalogue of an Unusual*

antiquity Taking as its focus the sounding statue a type of anthropocentric statue that invites the viewer to imagine sounds the statue might make The Sculpted Ear rethinks this relationship in light of discourses on aurality emerging within the field of sound studies Ryan McCormack argues that the sounding statue is best thought of not as an aesthetic object but as an event heard by people and subsequently conceptualized into being through acts of writing and performance Constructing a history in which hearing plays an integral role in ideas about anthropocentric statuary McCormack begins with the ancient sculpture of Laocoön before moving to a discussion of the early modern automaton known as Tipu's Tiger and the statue of the Commendatore in Mozart's Don Giovanni Finally he examines statues of people from the present and the past including the singer Josephine Baker the violinist Aleksandar Nikolov and the actor Bob Newhart with each case touching on some of the issues that have historically plagued the aesthetic viability of the sounding statue McCormack convincingly demonstrates how sounding statues have served as important precursors and continuing contributors to modern ideas about the ontology of sound technologies of sound reproduction and performance practices blurring traditional divides between music sculpture and the other arts A compelling narrative that illuminates the stories of individual sculptural objects and the audiences that hear them this book will appeal to anyone interested in the connections between aurality and statues in the Western world in particular scholars and students of sound studies and sensory history **Aesthetics and Music** Andy Hamilton, 2007-08-29 An engaging but sophisticated look at the debates and ideas involved in the aesthetics of music part of a major new series from Continuum Art and Archaeology , 1921
