Territorial Justice

David Challis

Territorial Justice:

Social Justice and the City David Harvey, 2010-04-15 Throughout his distinguished and influential career David Harvey has defined and redefined the relationship between politics capitalism and the social aspects of geographical theory Laying out Harvey's position that geography could not remain objective in the face of urban poverty and associated ills *Social Justice and the City* is perhaps the most widely cited work in the field Harvey analyzes core issues in city planning and policy employment and housing location zoning transport costs concentrations of poverty asking in each case about the relationship between social justice and space How for example do built in assumptions about planning reinforce existing distributions of income Rather than leading him to liberal technocratic solutions Harvey's line of inquiry pushes him in the direction of a revolutionary geography one that transcends the structural limitations of existing approaches to space Harvey's emphasis on rigorous thought and theoretical innovation gives the volume an enduring appeal This is a book that raises big questions and for that reason geographers and other social scientists regularly return to it *Seeking Spatial Justice* Edward W.

Soja, 2013-11-30 In 1996 the Los Angeles Bus Riders Union a grassroots advocacy organization won a historic legal victory against the city's Metropolitan Transit Authority The resulting consent decree forced the MTA for a period of ten years to essentially reorient the mass transit system to better serve the city's poorest residents A stunning reversal of conventional governance and planning in urban America which almost always favors wealthier residents this decision is also for renowned urban theorist Edward W Soja a concrete example of spatial justice in action In *Seeking Spatial Justice* Soja argues that justice has a geography and that the equitable distribution of resources services and access is a basic human right Building on current concerns in critical geography and the new spatial consciousness Soja interweaves theory and practice offering new ways of understanding and changing the unjust geographies in which we live After tracing the evolution of spatial justice and the closely related notion of the right to the city in the influential work of Henri Lefebvre David Harvey and others he demonstrates how these ideas are now being applied through a series of case studies in Los Angeles the city at the forefront of this movement Soja focuses on such innovative labor community coalitions as Justice for Janitors the Los Angeles Alliance for a New Economy and the Right to the City Alliance on struggles for rent control and environmental justice and on the role that faculty and students in the UCLA Department of Urban Planning have played in both developing the theory of spatial justice and putting it into practice Effectively locating spatial justice as a theoretical concept a mode of empirical analysis and a strategy for social and political action this book makes a significant contribution to the contemporary debates about justice space and the city **Land, Conflict, and Justice** Avery Kolers, 2009-02-12 in territory and justice Book Jacket

Justice, Society and Nature Brendan Gleeson, Nicholas Low, 2002-09-11 *Justice Society and Nature* examines the moral response which the world must make to the ecological crisis if there is to be real change in the global society and economy to favour ecological integrity From its base in the idea of the self through principles of political justice to the justice of global

institutions the authors trace the layered structure of the philosophy of justice as it applies to environmental and ecological issues Philosophical ideas are treated in a straightforward and easily understandable way with reference to practical examples Moving straight to the heart of pressing international and national concerns the authors explore the issues of environment and development fair treatment of humans and non humans and the justice of the social and economic systems which affect the health and safety of the peoples of the world Current grass roots concerns such as the environmental justice movement in the USA and the ethics of the international regulation of development are examined in depth The authors take debates beyond mere complaint about the injustice of the world economy and suggest what should now be done to do justice to nature

Global Justice and Territory Cara Nine,2012-05-31 Historical injustice and global inequality are basic problems embedded in territorial rights In *Global Justice and Territory* Cara Nine advances a general theory of territorial rights adapting a theoretical framework from natural law theory to ground all territorial claims

Transforming Spatial Data into Public Policies for Social Justice and Environmental Sustainability Alexandra Aragão,2023-05-24

Environmental justice and social justice are well established concepts in social research This book goes beyond the established discourse to show how Geographic Information Systems can unveil higher levels of spatial unfairness when both forms of injustice coincide in the same place Territorial injustice is the result of the disproportionately higher exposure of vulnerable communities to pollution and environmental risks Overlapping layers of georeferenced environmental and social information generate maps depicting territorial injustice which can be a powerful tool to facilitate social dialogue and prompt policy change This volume brings approaches from ten Latin American countries to demonstrate how the interdisciplinarity between law and Geographic Information Systems can contribute to the development of fairer public policies and prevent and mitigate cases of extreme injustice The case studies presented are relevant to support the development of geolaw and to inspire pragmatic strategies aimed both at social justice and environmental sustainability

Spatial Justice Andreas Philippopoulos-Mihalopoulos,2014-10-30 There can be no justice that is not spatial Against a recent tendency to despatialise law matter bodies and even space itself this book insists on spatialising them arguing that there can be neither law nor justice that are not articulated through and in space *Spatial Justice* presents a new theory and a radical application of the material connection between space in the geographical as well as sociological and philosophical sense and the law in the broadest sense that includes written and oral law but also embodied social and political norms More specifically it argues that spatial justice is the struggle of various bodies human natural non organic technological to occupy a certain space at a certain time Seen in this way spatial justice is the most radical offspring of the spatial turn since as this book demonstrates spatial justice can be found in the core of most contemporary legal and political issues issues such as geopolitical conflicts environmental issues animality colonisation droning the cyberspace and so on In order to argue this the book employs the lawscape as the tautology between law and space and the concept of atmosphere in its geological political aesthetic legal and

biological dimension Written by a leading theorist in the area Spatial Justice Body Lawscape Atmosphere forges a new interdisciplinary understanding of space and law while offering a fresh approach to current geopolitical spatialelegal and ecological issues Justice, Rights, and Toleration Neil Hibbert, Charles Jones, Steven Lecce, 2024-01-15 The political theory of Richard Vernon has been a guiding light for students of politics for over five decades From the situated ethics of shared citizenship to the normative character of individuals connections to members of other societies and generations Vernon has cleared a distinctive course in his contributions to the many complex dimensions of political morality Justice Rights and Toleration centres on the core ideas that animate Vernon s approach to political theory Contributors to this volume all former students and colleagues of Vernon offer critical engagement with the fundamental themes threaded throughout the thinker s work on the perennial political challenges in liberal democratic societies including the understanding of citizenship and political membership justice within and between nations and generations the rights of children and parents and the idea of toleration Vernon articulated a clear vision of the nature of these problems as well as a nuanced approach to addressing them one rooted in the ideas of democratic dialogue and justice The essays in this volume are a testament to the breadth of the pressing issues on which Vernon s work continues to advance critical insights Justice Rights and Toleration provides a worthy tribute to the wide range of Richard Vernon s interests and the inspiration still to be found in his deep yet subtle body of work in political theory *The Temporal Dimension of Justice* Santiago Truccone, 2024-10-21 Should historical injustices always be repaired Upon scrutinising public institutions and present holdings it becomes evident that many are partially the result of past injustices Consequently the imperative to rectify and repair historical injustices emerges However as circumstances change over time and these changes affect justice the argument for repairing historical injustices becomes more intricate The distributive and reparative aspects of justice may be in tension with each other Possible tensions between these aspects of justice are assessed by discussing the thesis about the supersession of historical injustices Different facets of the supersession thesis are evaluated in two contexts The first context explored in the initial part of the book examines whether and if so under what conditions post colonial injustices against 19th century Latin American indigenous peoples should be repaired The second context explored later in the book assesses how climate burdens should be distributed globally and how to respond to potential injustices arising from departures from a fair climate transition towards net zero CO2 emissions societies The book demonstrates that repairing historical injustices is compatible with the imperatives of distributive justice *Long-Term Care: Matching Resources and Needs* David Challis, 2018-01-18 Improving equity and efficiency in the long term care of older people is an international concern with governments attempting to ensure that policies and practice develop so that resources are used to best effect This requires good quality evidence founded on sound theory This volume honours the outstanding contribution of Bleddyn Davies to this field bringing together perspectives of scholars and practitioners from many countries including the UK Australia Hong Kong Japan Sweden and the USA

Contemporary policy dilemmas are considered leavened by professional anecdote A chapter from Davies himself reflecting on the origins of the PSSRU Personal Social Services Research Unit concludes the volume that also features a full listing of his books and monographs which will prove invaluable to those seeking to engage with his contribution to the field This volume will greatly interest academics in social policy social work gerontology and social care as well as professionals in the field
