What We Know About Grading

Thomas R. Guskey, Susan M. Brookhart, 2019-02-04 Grading is one of the most hotly debated topics in education and grading practices themselves are largely based on tradition instinct or personal history or philosophy But to be effective grading policies and practices must be based on trustworthy research evidence Enter this book a review of 100 plus years of grading research that presents the broadest and most comprehensive summary of research on grading and reporting available to date with clear takeaways for learning and teaching Edited by Thomas R Guskey and Susan M Brookhart this indispensable guide features thoughtful thorough dives into the research from a distinguished team of scholars geared to a broad range of stakeholders including teachers school leaders policymakers and researchers Each chapter addresses a different area of grading research and describes how the major findings in that area might be leveraged to improve grading policy and practice Ultimately Guskey and Brookhart identify four themes emerging from the research that can guide these efforts Start with clear learning goals Focus on the feedback function of grades Limit the number of grade categories and Provide multiple grades that reflect product process and progress criteria By distilling the vast body of research evidence into meaningful actionable findings and strategies this book is the jump start all stakeholders need to build a better understanding of what works and where to go from here Assessment and Grading in Classrooms Susan M.

Brookhart, Anthony J. Nitko, 2008 Assessment and Grading in Classrooms is particularly geared to the needs of classroom teachers emphasizing sound approaches to gathering both formative and summative information about student achievement of classroom learning targets interpreting standardized tests for classroom purposes and using information from multiple sources to help students learn Classroom examples and stories breathe life into the concepts presented in the text **The Realities of Classroom Testing and Grading** Quentin Durham, 2006 It is commonly believed that highly subjective humans ultimately perform all testing and grading efforts and that all testing and grading is completely subjective However Quentin Durham argues that there is no such thing as objective testing or grading With wit and clarity The Realities of Classroom Testing and Grading suggests that all testing and grading efforts from preschool to high school are fundamentally the same The instructor teaches what the student is supposed to learn assesses the student's understanding and reports the assessment to the people who count This book discusses a wide variety of generally taboo or ignored topics such as the multiple benefits of testing and grading beyond the obvious realities of standardized exams open book exams teaching exam taking exam subjectivity and relevance test wiley students cheating parent conferences grading methods that make sense and lots more **Tips for Improving Testing and Grading** John C. Ory, Katherine E. Ryan, 1993-08-10 Using detailed examples checklists and exercises the authors show how to develop use and grade classroom examinations They provide a thorough step by step discussion of general testing and grading issues including deciding on the content of an exam

Classroom Assessment and Grading That Work Robert J. Marzano, 2006-12-08 In *Classroom Assessment and Grading That Work* Robert J. Marzano provides an in depth exploration of what he calls one of the most powerful weapons in a teacher's arsenal. An effective standards based formative assessment program can help to dramatically enhance student achievement throughout the K-12 system. Marzano says. Drawing from his own and others extensive research the author provides comprehensive answers to questions such as these: What are the characteristics of an effective assessment program? How can educators use national and state standards documents as a basis for creating a comprehensive topic based assessment system? What types of assessment items and tasks are best suited to measuring student progress in mastering information mental procedures and psychomotor procedures? Why does the traditional point system used for scoring often lead to incorrect conclusions about a student's actual knowledge? What types of scoring and final grading systems provide the most accurate portrayal of a student's progress along a continuum of learning? In addition to providing teachers with all the tools they need to create a better assessment system *Classroom Assessment and Grading That Work* makes a compelling case for the potential of such a system to transform the culture of schools and districts and to propel K-12 education to new levels of effectiveness and efficiency.

Rethinking Grading Cathy Vatterott, 2015-07-13 Grading systems often reward on time task completion and penalize disorganization and bad behavior. Despite our best intentions grades seem to reflect student compliance more than student learning and engagement. In the process we inadvertently subvert the learning process. After careful research and years of experiences with grading as a teacher and a parent Cathy Vatterott examines and debunks traditional practices and policies of grading in K-12 schools. She offers a new paradigm for standards based grading that focuses on student mastery of content and gives concrete examples from elementary middle and high schools. *Rethinking Grading* will show all educators how standards based grading can authentically reflect student progress and learning and significantly improve both teaching and learning. Cathy Vatterott is an education professor and researcher at the University of Missouri St. Louis a former middle school teacher and principal and a parent of a college graduate. She has learned from her workshops that grading continues to be the most contentious part conjuring up the most intense emotions and heated disagreements. Vatterott is also the author of the book *Rethinking Homework: Best Practices That Support Diverse Needs*.

policies for report card grading Implementing learning focused grading policies Communicating with students and parents Assessing school or district readiness for grading reform The book is grounded in research and resonates with the real lessons learned in the classroom Although grading is a necessary part of schooling Brookhart reminds us that children are sent to school to learn not to get grades This highly practical book will help you put grading and learning into proper perspective offering strategies you can use right away to ensure that your grading practices actually support student learning *Grading Student Achievement in Higher Education* Mantz Yorke, 2007-09-12 A lot hangs on the summative grades that students are given A good degree opens doors which otherwise might remain closed Yet as higher education is now a mass rather than an elite system what is expected of its graduates is different from the expectations of previous generations Students are expected not only to be able to demonstrate high standards of academic achievement but also a variety of capabilities that have at different times been given labels such as generic skills and transferable skills These abilities are difficult to grade for a variety of reasons and some graduates may be losing out because their particular strengths are given insufficient acknowledgement in current summative assessment practices Using the UK honours degree classifications as a case study this book appraises the way in which summative assessment in higher education is approached and shows that the foundations of current practices in the UK and elsewhere are of questionable robustness It argues that there is a need to widen the assessment frame if the breadth of valued student achievements is to be recognised adequately
