MD, 2016-03-15 This is a controversial account of why because of the barriers to testosterone action in the body men can have normal levels of testosterone but still have life love and health wrecking symptoms of testosterone deficiency which need treatment The deficiency is increasingly being linked to common and serious medical conditions such as obesity diabetes heart and circulatory disorders and even Alzheimers disease This has clearly been shown by the authors pioneering research publications as well as those of other colleagues and researchers worldwide However in the majority of cases they are often denied this because of the lack of understanding of the medical profession and other authorities regulating the treatment This is a wake up call to both doctors and patients alike to treat the symptoms of testosterone deficiency and related conditions with what the author argues is the most effective safest and economic form of preventive medicine of the twenty first century The Official Anti-Aging Revolution (Volume 1 of 3) (EasyRead Super Large 18pt Edition) ,
