Charles Leslie Glenn

The Myth Of The Common School:

The Myth of the Common School Charles Leslie Glenn, 1988 **The Myth of the Common School** Charles Leslie Glenn, 1988 **The Fractured Schoolhouse** Neal P. McCluskey, 2022-09-15 American public schooling was established to unify diverse people and prepare citizens for democracy Intuitively it would teach diverse people the same values preferably in the same buildings with the goal that they will learn to get along and uphold government by the people But intuition can be wrong significant evidence suggests that public schools have not brought diverse people together whether from legally mandated racial segregation espousing values many people could not accept or human beings simply tending to associate with others like themselves Indeed the basic reality that people have diverse values and desires has rendered public schooling not a unifying force but a battleground That public schooling is necessary for democracy is also not supported both because we do not have a commonly agreed upon definition of democracy and because public schooling violates the bedrock American value liberty that democracy is supposed to protect **The Fractured Schoolhouse** Reexamining Education for a Free Equal and Harmonious Society proposes that to fulfill the mission of public schooling we need what some might call its opposite school choice Education grounded in liberty would enable diverse people to pursue curricula and policies they think are right without having to impose them on others and by making separated groups equals and easing the creation of new identities it would foster bridge building **Between Memory and Vision** Steven C. Vryhof, 2004 By closely examining a variety of Protestant schools education expert Steven Vryhof uncovers the complexities subtleties and nuances of faith based education that often elude those concerned only with producing higher test scores a moral environment or a competitive workforce Through candid interviews with parents of children in faith based schools Vryhof also answers questions that other interested parents may have about the benefits of faith based education for their own children Jacket **The Challenge of Pluralism** Stephen V. Monsma, J. Christopher Soper, 2009 Provides a comparative analysis of church state issues in the United States the Netherlands Australia England and Germany and argues that the U S is unique in the way it resolves religious freedom and religious establishment questions **Reinterpreting Urban School Reform** Louis F. Miron, Edward P. St. John, 2003-04-09 A critical look at urban school reform efforts **When Sacred and Secular Mix** Stephen V. Monsma, 2000 Explores the world of religiously based private nonprofit organizations and their receipt of public funds Introduction **The American Model of State and School** Charles L. Glenn, 2012-04-26 *State and Schools* argues that the American educational model represents a third way of organizing the provision of schooling and that this accounts for some of its strengths as well as some of its weaknesses Charles L Glenn looks closely at the tradition of democratic localism in the management of schooling and the powerful and anti democratic effect of the emerging education profession which has in some respects the characteristics of a religious movement more than of a true profession A sweeping chronological survey *State and Schools* includes chapters on the colonial background schooling in the New Republic the creation of an education

profession and the progressive education movement among others Glenn's primary purpose in this authoritative and thoroughly researched book is to illustrate the deep roots of ways of thinking about schools that have made it difficult for policy makers and the public to do what needs to be done to enable schools to function as they should for our society and for future generations

Making the American Self Daniel Walker Howe, 2009-09-22 Originally published in 1997 and now back in print *Making the American Self* by Daniel Walker Howe the Pulitzer Prize winning author of *What Hath God Wrought* charts the genesis and fascinating trajectory of a central idea in American history One of the most precious liberties Americans have always cherished is the ability to make something of themselves to choose not only an occupation but an identity Examining works by Benjamin Franklin Jonathan Edwards Abraham Lincoln Frederick Douglass Henry David Thoreau Ralph Waldo Emerson Margaret Fuller and others Howe investigates how Americans in the 18th and 19th centuries engaged in the process of self construction self improvement and the pursuit of happiness He explores as well how Americans understood individual identity in relation to the larger body politic and argues that the conscious construction of the autonomous self was in fact essential to American democracy that it both shaped and was in turn shaped by American democratic institutions The thinkers described in this book Howe writes believed that to the extent individuals exercised self control they were making free institutions liberal republican and democratic possible And as the scope of American democracy widened so too did the practice of self construction moving beyond the preserve of elite white males to potentially all Americans Howe concludes that the time has come to ground our democracy once again in habits of personal responsibility civility and self discipline esteemed by some of America's most important thinkers Erudite beautifully written and more pertinent than ever as we enter a new era of individual and governmental responsibility *Making the American Self* illuminates an impulse at the very heart of the American experience

The Common School Teacher, 1878
