The Nabateans In The Negev:

The Religion of the Nabataeans J.F. Healey, 2015-08-27 The history of the Nabataean Kingdom of Hellenistic Roman times centred on Petra is now well known but until the publication of this book no monograph has been devoted to Nabataean religion known to us principally from inscriptions in Nabataean Aramaic iconography archaeology and Greek literary texts After a critical survey of the sources the author analyses systematically the information on the individual gods worshipped by the Nabataeans including a detailed illustrated account of temples and iconography A further major section discusses religious themes aniconism henotheism death cult and the divinisation of kings In a final chapter Nabataean religion is considered in relation to Judaism Christianity and Islam The book will be of particular interest to historians of religion in the Graeco Roman Near East and to Semitic epigraphists

Retrieving the Past Joe D. Seger, 1996 The Formation of Nabatean Art Joseph Patrich, 2023-09-20 It is well known that during the Second Temple period the Jews of Judea strictly observed the injunction against graven images Although the Jews borrowed techniques and artistic styles from the surrounding Hellenistic Roman culture they abstained from using images in their art What is less well known is that during the same period a similar phenomenon was taking place in the adjacent Arab kingdom of Nabatea and this despite the fact that unlike the monotheistic Jews the Nabateans worshipped many deities In both kingdoms political independence went hand in hand with a cultural independence that expressed itself in religion language script and art Although continuity with iconoclastic Judea may have had some influence on Nabatean steadfastness to tradition under pressure from the dominant Hellenistic Roman culture it appears that their abstract perception of their gods and disregard for figurative art were innate growing out of a particular theological doctrine The principles of that doctrine have not been preserved but we can deduce its existence and to a lesser degree its nature on the basis of certain archaeological discoveries that we will discuss here subsequently Unlike the common practice both in the Greco Roman West and in the Parthian East to accord the gods a human form the Nabateans represented their gods in the form of a stele The abstract manner in which they perceived the form of their deities affected their approach towards figurative art A systematic survey of Nabatean art indicates that negation of figurative art is evident in all domains of their creativity Hundreds of years before the Nabatean civilization but in this same geographical area there was a similar religious and artistic phenomenon of venerating stele gods and negating figurative art among another Arabian tribe which scholars tend to identify with the biblical Midianites The same spiritual wellsprings that nourished a nonfigurative tradition among the North Arabian tribes for hundreds of years first the Midianites and then the Nabateans ultimately resurfaced nourishing the nonfigurative tendency we see in Islamic Arabian art This book examines the origins of prohibition of a graven image among the Nabateans its effect on all facets of Nabatean art and its subsequent influence on Islamic art several hundred years hence The implications for the history both of ancient religions and art lend to Nabatean

The Nabateans in the Negev ,2003 **The Religious Life of Nabataea** Peter

Alpass,2013-06-13 Flourishing in the centuries around the birth of Christ the Nabataean kingdom covered a large swathe of the north western Arabian Peninsula and was shaped by cultural influences from the Mediterranean Arabian and wider Semitic worlds The Religious Life of Nabataea examines the inscriptions sculptures and architectural remains left by worshippers in every corner of the kingdom from the spectacular remains of the desert city of Petra to the fertile plains of southern Syria While previous scholarly approaches have minimised the diversity of cultic practices and traditions found in Nabataea this study reveals a vibrant religious landscape dominated by a variety of local traditions

Reuven ve-'Iddit Hecht,2003 **Roads in the Deserts of Roman Egypt** Maciej

Paprocki,2019-07-19 Egypt under the Romans 30 BCE 3rd century CE was a period when local deserts experienced an unprecedented flurry of activity In the Eastern Desert a marked increase in desert traffic came from imperial prospecting quarrying activities and caravans transporting wares to and from the Red Sea ports In the Western Desert resilient camels slowly became primary beasts of burden in desert travel enabling caravaneers to lengthen daily marching distances across previously inhospitable dunes Desert road archaeology has used satellite imaging landscape studies and network analysis to plot desert trail networks with greater accuracy however it is often difficult to date roadside installations and thus assess how these networks evolved in scope and density in reaction to climatic social and technological change Roads in the Deserts of Roman Egypt examines evidence for desert roads in Roman Egypt and assesses Roman influence on the road density in two select desert areas the central and southern section of the Eastern Desert and the central Marmarican Plateau and discusses geographical and social factors influencing road use in the period demonstrating that Roman overseers of these lands adapted remarkably well to local desert conditions improving roads and developing the trail network Crucially the author reconceptualises desert trails as linear corridor structures that follow expedient routes in the desert landscape passing through at least two functional nodes attracting human traffic be those water sources farmlands mines quarries trade hubs military installations or actual settlements The route of least resistance across the desert varied from period to period according to the available road infrastructure and beasts of burden employed Roman administration in Egypt not only increased the density of local desert node networks but also facilitated internodal connections with camel caravans and transformed the Sahara by establishing new or embellishing existing nodes effectively funnelling desert traffic into discernible corridors Significantly not all desert areas of Egypt are equally suited for anthropogenic development but almost all have been optimised in one way or another with road installations built for added comfort and safety of travellers Accordingly the study of how Romans successfully adapted to desert travel is of wider significance to the study of deserts and ongoing expansion due to global warming **The marzēah in the Prophetic Literature** John McLaughlin,2014-09-03 The marz a existed for 3000 years in the Semitic world but is only mentioned in the First Testament at Amos 6 7 and Jer 16 5 Other prophetic texts have been proposed as allusions that do not use the term but without using any consistent criteria This

study analyzes those allusions in light of the extra biblical references The extra biblical marz a references indicate three consistent features upper class drinking within a religious context These elements provide the minimum criteria for evaluating possible allusions in the books of Amos Hosea Isaiah and Ezekiel plus the direct references at Amos 6 7 and Jeremiah 16 5 Combining all known references with the biblical allusions provides a single point of reference for future work on the marz a This volume will be of special value to those interested in ancient Semitic religion **Israel and the Palestinian Territories** Daniel Jacobs, Shirley Eber, Francesca Silvani, 1998 This is the most complete and topical guide to the region with detailed accounts of all the historic monuments and the Jewish Islamic and Christian holy sites *Climate Changes during the Holocene and their Impact on Hydrological Systems* Arie S. Issar, 2004-08-05 It is now widely accepted that increasing concentrations of greenhouse gases in the atmosphere are causing higher global atmospheric temperatures However there is still a great deal of uncertainty about the likely effects of such a temperature rise on climate and even more about the impacts of climate change and variability on the world s hydrological regimes and socio economic systems Studying the effects of climate variability in the past can give clues as to possible future effects This volume provides a comprehensive review of the effects of climate variability on hydrological and human systems in the Holocene the last 10 000 years in various parts of the world The book concentrates on the regions bordering the Mediterranean Sea western and central Europe China Japan West and South Africa and the southwestern USA This book will be of value to researchers and professionals in hydrology climatology geology and historical geography
