The National Trust Rivers of Britain Richard Muir, Nina Muir, 1986 **The National Trust Rivers of Britain** Richard Muir, 1992 **The Historic King Arthur** Frank D. Reno, 2007-03-20 Who was King Arthur How did the story originate Through careful research of the many primary documents a picture of the true Arthur can in fact be set down He reached power shortly after the Romans evacuated Britain at the end of the fifth century and died at the Battle of Camlann He became king at 15 under the name of Ambrosius Aurelianus and fought against the Saxons on the mainland as Riothamus thus explaining the regeneration motif so closely tied to the mythical Arthur This study reveals that the integrity and ideals central to Arthurian myth were very much a part of the real Arthur **Exploring the Thames Wilderness** Richard Mayon-White, Wendy Yorke, 2013-05-09 The River Thames is an often undiscovered haven of stunning scenery wonderful wildlife and brilliant natural beauty As well as the famous stretches passing through our biggest cities and towns there is a hidden side to the river wild and natural but surprisingly accessible This guidebook compiled by the two major Thames charities contains a wealth of information on over 150 of the best places to explore the real Thames wilderness along with enjoyable walks and activities along its course Organised geographically the book gives information on the history and character of each stretch of the river and the featured sites within it travelling from source to sea Illustrated with maps and photos the text highlights which plants and wildlife to watch out for activities you can do how to get there and nearby moorings cycle paths and car parks Each section features a circular walk tying together several of the sites and accompanied by an enchanting hand drawn map An essential source of ideas for days out and handy for on the go Exploring the Thames Wilderness opens up the beauty of the Thames to everyone **Canals in a Changing Britain** Jules P. Gehrke, 2024-12-15 Canals in a Changing Britain Construction Culture and Environment 1760 1968 assesses canals as a major technological system re shaping Britons relationship with their landscape and environment for over 200 years It offers a sustained narrative addressing canal construction in the late eighteenth century living and working communities alongside canals in the nineteenth century canals relationship to concerns regarding de industrialization in the early twentieth century and canals as sites for the experience of nature and rural life in the postwar era between 1945 and 1968 This book makes use of a variety of archival and published material on canals and references academic publications on histories of technology and the environment as well as scholarship related specifically to canals It argues contemporary conversations regarding the current and future use of canals as multi faceted sites of recreation leisure heritage and experience of the natural environment in Britain must be seen in the context of an arc of historical experience between 1760 and 1968 **The Public Value of the Humanities** Jonathan Bate, 2011-01-27 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com Recession is a time for asking fundamental questions about value At a time when governments are being forced to make swingeing savings in public expenditure why should they

continue to invest public money funding research into ancient Greek tragedy literary value philosophical conundrums or the aesthetics of design Does such research deliver value for money and public benefit Such questions have become especially pertinent in the UK in recent years in the context of the drive by government to instrumentalize research across the disciplines and the prominence of discussions about economic impact and knowledge transfer In this book a group of distinguished humanities researchers all working in Britain but publishing research of international importance reflect on the public value of their discipline using particular research projects as case studies Their essays are passionate sometimes polemical often witty and consistently thought provoking covering a range of humanities disciplines from theology to architecture and from media studies to anthropology

Environmental Assessment, 1994 This special publication is aimed at government planning authorities developers design and other consultants and environmental groups Its objective is to heighten awareness and encourage due consideration of environmental implications during the planning design construction and operation stages of any scheme and when considering arrangements for closure and decommissioning where relevant
