[The Naturalist on the River Amazons, a Record of Adventures, Habits of Animals, Sketches of Brazilian and Indian Life, and Aspects of Nature Under the Equator, During Eleven Years of Travel, by Henry Walter Bates,... 3rd Edition...](#) Henry Walter Bates,1873 *The Naturalist on the River Amazon* Henry Walter Bates,2009-07-20 First published in 1863 this is a first hand account of Henry Walter Bates eleven year expedition to the river Amazon in 1848 during which he discovered some eight thousand species unknown to the natural sciences Written in the first person it records the astonishing range of natural life in the regions traversed by the Amazon and its tributaries Describing his adventures south of the equator Bates takes the reader through Par Tocantins Camet Maraj Carip Obydos Manos Santarem Tapajos and Ega descriptively cataloguing the rich vegetation aboriginal population and wondrous birds animals and insects of these regions More than just a scientist s log the work that took Bates three years to complete was considered by Darwin to be the best work of natural history travels ever published in England This third edition of the book 1873 also contains numerous illustrations by the noted zoologist Joseph Wolf

The Naturalist on the River Amazons Henry Bates,2017-01-04 In company with Alfred Russell Wallace the author in 1848 began an exploration of the Amazon region for the collection of objects of natural history This volume records the adventures of an eleven years sojourn during which specimens of nearly fifteen thousand species were obtained and includes the descriptions of habits of animals sketches of Brazilian and Indian life and various aspects of nature under the equator Mr Bates was widely known as the discoverer of the principle of mimicry in the animal world He had not the advantage of an early education but by the unaided force of his ability and his natural goodness of heart made himself almost indispensable to the Geographical Society Of his well known book *The Naturalist on the River Amazons* Darwin said that it was the best work of natural history travels ever published in England *The Education Outlook* An original book a book of great value and one which adds another to the many claims of the modern man of science to share the palm of martyrdom with the old religious martyrs In July 1959 after eleven years residence within four degrees of the equator the last three of which were spent in the wild country 1 400 miles from the sea coast Mr Bates returned to England with shattered health so shattered that he despaired of ever publishing his travels As it is we owe their publication to the friendly encouragement of Mr Darwin and to the high opinion he expressed of the results of Mr Bates journey In tone and style Mr Bates is perfectly good natured straightforward and unpretending The absence of all striking generalizations and of any special assumption of poetical feeling rather adds to the simple charm of his account It is the view of a devoted and discriminating man starting on his expedition with the knowledge of a well read naturalist and the keen observation of an Englishman but whose vision is if

unaided unobscured by his fancy and let us say undisturbed by any higher or more delicate flights Mr Bates confirms Mr Darwin's theory of natural selection by several pointed instances but on the whole his book belongs rather to the class of first rate diaries a fascinating collection of materials for future edification But very fascinating it is nor could we point to any page which is not full of lively interest Mr Bates belongs to the small class of men who deserve the earnest gratitude not only of their own country but of the civilized world The Spectator This most famous work is a natural history classic London Literary World Darwin unhesitatingly pronounced the best book on natural history which ever appeared in England The work still retains its prime interest and in rereading it one can not but be impressed by the way in which the prophetic theories disputed and ridiculed at the time have since been accepted Such is the common experience of those who keep a few paces in advance of their generation Bates was a born naturalist Philadelphia Ledger No man was better prepared or gave himself up more thoroughly to the task of studying an almost unknown fauna or showed a zeal more indefatigable in prosecuting his researches than Bates As a collector alone his reputation would be second to none but there is a great deal more than sheer industry to be cited The naturalist of the Amazons is par excellence possessed of a happy literary style His is always clear and distinct He tells of the wonders of tropical growth so that you can understand them all The New York Times
