Time Honored

John H. Stubbs, 2009-01-14 The absence heretofore of a comparably thoroughgoing but accessible resource on a topic of such urgent public concern was a glaring lapse that makes this deeply researched lucidly written and helpfully annotated book an invaluable addition to the literature New York Review of Books Time Honored is a comprehensive survey of the practice theory and structure of architectural heritage conservation throughout the world Offering an argument for why architectural conservation is indispensable to modern life Time Honored describes its parameters and evolution in an historical context and then methodically presents approaches used in various countries showing how historic preservation in the West differs from conservation in the rest of the world Illustrated throughout with over 300 photographs drawings maps and charts No other book navigates the global conservation programs policies and project types so completely **Architectural**

Conservation in Europe and the Americas John H. Stubbs, Emily G. Makaš, 2011-05-04 From such well known and long vexed sites as the Athenian Acropolis to more contemporary locales like the Space Age Modernist capital city of Brasilia the conflicting and not always neatly resolvable forces that bear upon preservation are addressed as clearly and thoughtfully as the general reader could hope for New York Review of Books an astonishing feat of research compilation and synthesis Context The book delivers the first major survey concerning the conservation of cultural heritage in both Europe and the Americas Architectural Conservation in Europe and the Americas serves as a convenient resource for professionals students and anyone interested in the field Following the acclaimed Time Honored this book presents contemporary practice on a country by country and region by region basis facilitating comparative analysis of similarities and differences The book stresses solutions in architectural heritage protection and the contexts in which they were developed **Material Culture**

Studies in America Thomas J. Schlereth, 1999 The country's leading authority on use of artifactual evidence in historical research collects twenty five classic essays and gives his overview of the field of material culture **America's Forgotten**

Architecture National Trust for Historic Preservation in the United States, Tony P. Wrenn, Elizabeth D. Mulloy, 1976

Describes and pictures buildings and places throughout the United States deemed worthy of preservation and explains ways in which architecturally valuable structures and cities have been saved **Common Places** Dell Upton, John Michael

Vlach, 1986 Exploring America's material culture Common Places reveals the history culture and social and class relationships that are the backdrop of the everyday structures and environments of ordinary people Examining America's houses and cityscapes its rural outbuildings and landscapes from perspectives including cultural geography decorative arts architectural history and folklore these articles reflect the variety and vibrancy of the growing field of vernacular architecture In essays that focus on buildings and spaces unique to the U.S. landscape Clay Lancaster Edward T. Price John Michael Vlach and Warren E. Roberts reconstruct the social and cultural contexts of the modern bungalow the small town

courthouse square the shotgun house of the South and the log buildings of the Midwest Surveying the buildings of America's settlement scholars including Henry Glassie Norman Morrison Isham Edward A Chappell and Theodore H M Prudon trace European ethnic influences in the folk structures of Delaware and the houses of Rhode Island in Virginia's Renish homes and in the Dutch barn widely repeated in rural America Ethnic regional and class differences have flavored the nation's vernacular architecture Fraser D Neiman reveals overt changes in houses and outbuildings indicative of the growing social separation and increasingly rigid relations between seventeenth century Virginia planters and their servants Fred B Kniffen and Fred W Peterson show how following the westward expansion of the nineteenth century the structures of the eastern elite were repeated and often rejected by frontier builders Moving into the twentieth century James Borchert tracks the transformation of the alley from an urban home for Washington's blacks in the first half of the century to its new status in the gentrified neighborhoods of the last decade while Barbara Rubin's discussion of the evolution of the commercial strip counterpoints the goals of city planners and more spontaneous forms of urban expression The illustrations that accompany each article present the artifacts of America's material past Photographs of individual buildings historic maps of the nation's agricultural expanse and descriptions of the household furnishings of the Victorian middle class the urban immigrant population and the rural farmer's homestead complete the volume rooting vernacular architecture to the American people their lives and their everyday creations

Reimagining Shakespeare's Playhouse Joe Falocco, 2010 Numerous attempts have been made in the modern and postmodern era to recreate the staging conventions of Shakespeare's theatre from William Poel to the founders of the New Globe This volume examines the work of these directors analyzing their practical successes and failures it also engages with the ideological critiques of early modern staging advanced by scholars such as W B Worthen and Ric Knowles The author argues that rather than indulging in archaism for its own sake the movement looked backward in a progressive attempt to address the challenges of the twentieth century The book begins with a re-examination of the conventional view of Poel as an antiquarian crank Subsequent chapters are devoted to Harley Granville Barker and Nugent Monck the author argues that while Barker's major contribution was the dubious achievement of establishing the movement's reputation as an essentially literary phenomenon Monck took the first tentative steps toward an architectural reimagining of modern performance space an advance which led to later triumphs in early modern staging The book then traces the sporadic and irregular development of Tyrone Guthrie's commitment to early modern practices The final chapter looks at how competing historical theories of playhouse design influenced the construction of the Globe while the conclusion discusses the ongoing potential of early modern staging in the new millennium
