TOWARDS A THEORY OF TEACHING *The Pedagogy of Protest* Brendan Walsh, 2007 This book provides the first
complete account of Patrick Pearse's educational work at St Enda's and St Ita's schools Dublin Extensive use of first hand
accounts reveals Pearse as a humane energetic teacher and a forward looking and innovative educational thinker Between
1903 and 1916 Pearse developed a new concept of schooling as an agency of radical pedagogical and social reform later
echoed by school founders such as Bertrand Russell This placed him firmly within the tradition of radical educational thought
as articulated by Paulo Freire and Henry Giroux The book examines the tension between Pearse's work and his increasingly
public profile as an advocate of physical force separatism and by employing previously unknown accounts questions the
perception that he influenced his students to become active supporters of militant separatism The book describes the later
history of St Enda's revealing the ambivalence of post independence administrations and shows how Pearse's work which has
long been neglected by historians has had a direct influence on a later generation of school founders up to the present

Education W. Kenneth Richmond, 2019-01-15 Original blurb The volume of writing on educational topics has increased so prodigiously in recent years that the student is likely to lose himself in a sea of print This may lead him to opt for the first book that comes to hand or waste time rifling through half a dozen when a thorough grasp of one key text is all that is needed Reading lists commonly look impressive not to say daunting In fact the multifarious titles conceal an enormous amount of duplication an endless raking over of other people's research findings It is a safe bet writes W Kenneth Richmond that less than 5 percent of the contents of any new book on education will be in any way original This critical bibliography originally published in 1972 is concerned with the noteworthy books and major official reports that had appeared in the English language during the twenty five years prior to publication In his introduction and in the commentaries prefacing each section the author explains the background to the genuinely new departures of the period and describes successive changes in the climate of educational opinion
