The New English Grammar:

The New English Grammar N. R. Cattell, 1969 **A New English Grammar, Logical and Historical: Introduction, phonology, and accidence** Henry Sweet, 1900 The New English Grammar Norman Raymond Cattell, 1972 **A New English Grammar, Logical and Historical** Henry Sweet, 1898 *The new English grammar* N. R. Cattell, 1966 **A New English Grammar** Henry Sweet, 1955 **A New English Grammar - American Edition** Andrew Rossiter, 2021-08-16

A New English Grammar a grammar of American English is the American version of the author's acclaimed Descriptive Grammar of English. While the grammar of American English and of British English or International English are essentially the same, there are some differences and in this new American English version of the grammar, priority is given to American usage, making this an ideal reference book for teachers and students in high school and for anyone else wanting to gain a clearer understanding of English grammar. A review of the Descriptive Grammar of English in EFL Magazine commended it for the clarity of explanations and wealth of examples. For the purposes of this American English edition, examples of grammar usage have been selected to reflect the life and interests of readers in the United States, making them relevant to the experiences of American students or international students wishing to familiarize themselves with life and culture in the USA. This English Grammar uses American English spelling in those few cases where it differs from British English. It is important, however, to stress that American English and British English are one and the same language. The biggest differences between the two are phonetic, not grammatical. Native English speakers can usually tell if a speaker is from North America or from Britain or maybe from Australia or some other part of the English-speaking world, but they will find it much harder to notice without actually thinking about it whether a written document is in American English or in British English. There are a few telltale signs Americans write realize where the British will write realise. Americans write traveled while the British write travelled, and in this case it is the American spelling that respects the traditional rules concerning the doubling or not of consonants in English. In the twenty-first century, however, there is so much movement of both written texts and audio documents that the differences between American English and British English are becoming blurred. People in the USA read books and magazine articles, not to mention websites, written in British English, and people in the UK read plenty of books, articles, and websites written in American English. While most people in the USA who use a spell checker when writing will use one that is set up for American English, some will use one set up for British or international English, and if a few alert readers may notice the difference, most will not, and hardly any will be unduly worried. Still, it makes sense for anyone in the USA or international users who have more contact with American speakers to look at grammar in an American context, which is what this grammar book does.
