The New Face Of War Carrier Warfare:

The New Face of War Bruce D. Berkowitz, 2010-05-11 As American and coalition troops fight the first battles of this new century from Afghanistan to Yemen to the Philippines to Iraq they do so in ways never before seen Until recently information war was but one piece of a puzzle more than a sideshow in war but far less than the sum total of the game Today however we find information war revolutionizing combat from top to bottom Gone are the advantages of fortified positions nothing is impregnable any longer Gone is the reason to create an overwhelming mass of troops now troop concentrations merely present easier targets Instead stealth swarming and zapping precision strikes on individuals or equipment are the order of the day based on superior information and lightning fast decision making In many ways modern warfare is information warfare Bruce Berkowitz s explanation of how information war revolutionized combat and what it means for our soldiers could not be better timed As Western forces wage war against terrorists and their supporters in actions large and small on several continents The New Face of War explains how they fight and how they will win or lose There are four key dynamics to the new warfare asymmetric threats in which even the strongest armies may suffer from at least one Achilles heel information technology competition in which advantages in computers and communications are crucial the race of decision cycles in which the first opponent to process and react to information effectively is almost certain to win and network organization in which fluid arrays of combat forces can spontaneously organize in multiple ways to fight any given opponent at any time America s use of networked elite ground forces in combination with precision guided bombing from manned and unmanned flyers turned Afghanistan from a Soviet graveyard into a lopsided field of American victory Yet we are not invulnerable and the same technology that we used in Kuwait in 1991 is now available to anyone with a credit card and access to the Internet Al Qaeda is adept in the new model of war and has searched long and hard for weaknesses in our defenses Will we be able to stay ahead of its thinking In Iraq Saddam s army is in no position to defeat its enemies but could it defend Baghdad As the world anxiously considers these and other questions of modern war Bruce Berkowitz offers many answers and a framework for understanding combat that will never again resemble the days of massive marches on fortress like positions The New Face of War is a crucial guidebook for reading the headlines from across our troubled planet The New Face of War Malcolm W. Vandenengel, 2023-11-15 Winner of The Navy League's 2024 Alfred Thayer Mahan Award for Literary Achievement The nuclear powered aircraft carrier is naval history's most powerful and versatile warship It is the reason the U S Navy is the predominant force at sea today Throughout its illustrious history the carrier has overcome serious flaws including its expense vulnerability centralization of combat power and its airwing's short range The U S Navy always accepted those flaws because the carrier was the best means of delivering firepower Today's technologies however provide key opportunities for the U S Navy to move beyond the limitations of a carrier centric fleet by redesigning its force structure *Questioning the Carrier* examines how the U S Navy can embrace the Age of the Missile network the distributed fleet and diversify to develop a fleet that benefits from the aircraft carrier's many strengths without being wholly dependent on them By acting on those

opportunities the U S Navy can develop a structure that performs the carrier centric fleet s functions more effectively using a force consisting of more platforms with less total risk and within the same long term budget As adversaries are improving their ability to deter the carrier thus causing its utility to wane the author examines the Navy s past successes to show how it can overcome institutional resistance to change and continue to rule the seas *Forthcoming Books* Rose Army,1997

Naval Aviation News ,1949 **War and Technology** Jeremy Black,2020-03-04 A scholarly overview of military technology throughout history starting roughly in the 15th century and extending into the future insightful Publishers Weekly In this engaging book Jeremy Black argues that technology neither acts as an independent variable nor operates without major limitations This includes its capacity to obtain end results as technology s impact is far from simple and its pathways are by no means clear After considering such key conceptual points Black discusses important technological advances in weaponry and power projection from sailing warships to aircraft carriers muskets to tanks balloons to unmanned drones in each case taking into account what difference these advances made He addresses not only firepower but also power projection and technologies of logistics command and control Examining military technologies in their historical context and the present centered on the Revolution in Military Affairs and Military Transformation Black then forecasts possible future trends Clear concise and thoughtful An eminently readable synthesis of historical literature on technology and war John France author of *Perilous Glory The Rise of Western Military Power* An interesting thought provoking work by a major military historian whose depth and wide range of knowledge across the entire sweep of world military history is without parallel Those who read this book closely will be richly rewarded for it is a mine of useful information and grist for discussion Spencer C Tucker author of *The European Powers in the First World War* A most useful introduction to a very complex subject and particularly valuable for its notes and references to other works Provocative and vigorously argued Highly recommended Choice *Strategy Shelved* Steven Wills,2021-08-15 As U S strategy shifts once again to focus on great power competition *Strategy Shelved* provides a valuable analytic look back to the Cold War era by examining the rise and eventual fall of the U S Navy s naval strategy system from the post World War II era to 1994 Steven T Wills draws some important conclusions that have relevance to the ongoing strategic debates of today His analysis focuses on the 1970s and 1980s as a period when U S Navy strategic thought was rebuilt after a period of stagnation during the Vietnam conflict and its high water mark in the form of the 1980s maritime strategy and its attendant six hundred ship navy force structure He traces the collapse of this earlier system by identifying several contributing factors the provisions of the Goldwater Nichols Act of 1986 the aftermath of the First Gulf War of 1991 the early 1990s revolution in military affairs and the changes to the Chief of Naval Operations staff in 1992 following the end of the Cold War All of these conditions served to undermine the existing naval strategy system The Goldwater Nichols Act subordinated the Navy to joint control with disastrous effects on the long serving cohort of uniformed naval strategists The first Gulf War validated Army and Air Force warfare concepts

developed in the Cold War but not those of the Navy's maritime strategy. The Navy executed its own revolution in military affairs during the Cold War through systems like AEGIS but did not get credit for those efforts. Finally, the changes in the Navy OPNAV staff in 1992 served to empower the budget arm of OPNAV at the expense of its strategists. These measures laid the groundwork for a thirty-year strategy of means where service budgets, a desire to preserve existing force structure, and lack of strategic vision hobbled not only the Navy but also the Joint Force's ability to create meaningful strategy to counter a rising China and a revanchist Russian threat. Wills concludes his analysis with an assessment of the return of naval strategy documents in 2007 and 2015 and speculates on the potential for success of current Navy strategies, including the latest tri-service maritime strategy. His research makes extensive use of primary sources, oral histories, and navy documents to tell the story of how the U.S. Navy created both successful strategies and how a dedicated group of naval officers were intimately involved in their creation. It also explains how the Navy's ability to create strategy and even the process for training strategy writers was seriously damaged in the post-Cold War era.
