The French Revolution William Doyle, 2019 William Doyle chronicles the unfolding events of the French Revolution from the quarrels of the first revolutionaries with the king to the Terror to the rise of Napoleon Considering how and why the revolution destroyed the age old cultural institutional and social structures in France Doyle also explores its lasting effects today

The French Revolution as a Moment of Respatialization Matthias Middell, Megan Maruschke, 2019-09-23 The French Revolution has primarily been understood as a national event that also had a lasting impact in Europe and in the Atlantic world Recently historiography has increasingly emphasized how France's overseas colonies also influenced the contours of the French Revolution This volume examines the effects of both dimensions on the reorganization of spatial formats and spatial orders in France and in other societies It departs from the assumption that revolutions shatter not only the political and economic old regime order at home but in an increasingly interdependent world also result in processes of respatialization The French Revolution therefore is analysed as a key event in a global history that seeks to account for the shifting spatial organization of societies on a transregional scale
