The Fortifications of Paris Jean-Denis G.G. Lepage, 2015-05-20 As a strategically located seat of European power Paris was a prized target for invaders Consequently it was one of the world s most heavily fortified cities Though many of the fortifications have been demolished or hidden they have left their imprint on the city both physically and historically To understand the history of Paris and indeed of France as a whole one must understand the history of the fortifications This heavily illustrated history begins with the period 300 B C to A D 987 Part II looks at the Medieval era 987 1512 a growth period for the city Bastioned fortifications 1512 1874 are the focus of Part III covering the era in which Paris modernized its defenses Modern fortifications 1874 1944 are detailed in Part IV ranging from the building of the second Parisian ring of polygonal forts to the end of World War II

**Fortress Europe** J.E. Kaufmann, H.W. Kaufmann, 2022-06-02 A few of the fortifications and fortified lines of the world wars are well known and have often been written about illustrated and studied But they tend to distract attention from the wide range of fixed defenses constructed across Europe on an enormous scale after the Franco Prussian War of 1870 71 during a period of insecurity and aggression That is why this new highly illustrated study which covers the entire continent is so valuable The authors examine the major fortified positions and describe their strategic purpose their design and construction and the role they played in military planning and operations The outstanding contribution of the major military architects of the time is a key theme The work of S r de Rivi res Brialmont and others had a major influence on the course of the First World War and on the fortifications built before and during the Second World War Their approach is visible in the designs for the Maginot Line the East and West walls of Germany the Vallo Alpino in Italy the Soviet Stalin and Molotov lines the Mannerheim and Salpa lines of Finland the Greek Metaxas Line the Bene Line of Czechoslovakia as well as the defenses built by the Dutch and Scandinavians The breadth of the coverage the degree of detail and the numerous illustrations make the book essential reading and reference for anyone who has a special interest in the world wars and the history of fortifications

**Maginot Line Gun Turrets** Clayton Donnell, 2017-09-21 The Maginot Line was one of the most advanced networks of fortifications in history Built in the aftermath of World War I and stretching along the French eastern border from Belgium to Switzerland it was designed to prevent German troops from ever setting foot on French soil again Its primary defensive weapons were the gun turrets Beginning development in the 1870s and improving on

German designs they were constructed out of steel wedges and could revolve and disappear from sight after firing making them impervious to enemy bombardment They were deadly accurate and created havoc on the German units that attacked the line during their invasion of France in 1940 This fully illustrated study will examine the technical details of the French artillery turrets It will show the evolution of the design of the guns and turrets used in the French forts before and during World War I then those built exclusively for the Maginot Line to give a comprehensive overview of the weapons designed to protect France from invasion Modern European Military Fortifications, 1870-1950 J.E Kaufmann, Clayton

Donnell, 2004-10-30 This selected bibliography on modern European fortifications from 1850 to 1950 provides a selection of the most important books and articles written on this topic The work covers regions and countries and includes many sources on such popular topics such as the Maginot Line along with lesser known fortifications such as the Salpa Line and the Swiss National Redoubt References for the fortifications that appear cover everything from the Iberian Peninsula to the Soviet Union and from Scandinavia to the Mediterranean countries This work includes not only American and English but also non English publications This source features books and articles done in the nineteenth and twentieth century ending in December 2000 Each contributor is a member of SITE O an international fortifications research group In addition to helpful annotations each chapter includes summaries on the fortifications Also features a multi lingual glossary and reference maps

**Big Wars** John Storey, 2021-09-01 World War II was the biggest and most destructive war in history For two centuries wars had grown ever larger with the use of more terrible weapons and rising casualties culminating in the cataclysmic global events of 1939 45 And then quite suddenly large international wars have all but disappeared What caused wars to grow in size to such an extent and then shrink so precipitously Is this a permanent state of affairs or could big wars make a comeback Lawyer and historian John P Storey explores these questions by looking at the evolution of military technology and tactics over the long history of warfare From ancient bronze spears and chariots to World War II tanks and warplanes from the nuclear weapons of the Cold War to the drones and robotics of the future the changes in our methods of waging war has had and will continue to have a major impact on their size and destructiveness The sobering conclusion Storey makes is that based on past trends and the weapons in the pipeline for the future there is a much higher risk of there being much bigger wars in the coming decades *Humanity's Soldier* David Chuter, 1996 A study detailing the historical cultural and
