Conrad's Eastern Vision A. Yeow, 2008-11-20 This book traces the dialogic relation between Conrad's Eastern fiction and other histories arguing that it is in the intersections of art and history that we locate Conrad's irony In a direct response to the visual culture of his times Conrad sets up his fictional world as a hallucinated mirage stressing the veracity of his own Eastern vision

Omar Khayyam's Secret: Hermeneutics of the Robaiyat in Quantum Sociological Imagination Book 6: Khayyami Science Mohammad H. Tamdgidi, 2023-06-10 Omar Khayyam's Secret Hermeneutics of the Robaiyat in Quantum Sociological Imagination by Mohammad H Tamdgidi is a twelve book series of which this book is the sixth volume subtitled Khayyami Science The Methodological Structures of the Robaiyat in All the Scientific Works of Omar Khayyam Each book independently readable can be best understood as a part of the whole series In Book 6 Tamdgidi shares the Arabic texts his new English translations based on others or his new Persian translations also included in the volume and hermeneutic analyses of five extant scientific writings of Khayyam a treatise in music on tetrachords a treatise on balance to measure the weights of precious metals in a body composed of them a treatise on dividing a circle quadrant to achieve a certain proportionality a treatise on classifying and solving all cubic and lower degree algebraic equations using geometric methods and a treatise on explaining three postulation problems in Euclid's book Elements Khayyam wrote three other non extant scientific treatises on nature geography and music while a treatise in arithmetic is differently extant since it influenced the work of later Islamic and Western scientists His work in astronomy on solar calendar reform is also differently extant in the calendar used in Iran today A short tract on astrology attributed to him has been neglected Tamdgidi studies the scientific works in relation to Khayyam's own theological philosophical and astronomical views The study reveals that Khayyam's science was informed by a unifying methodological attention to ratios and proportionality So likewise any quatrain he wrote cannot be adequately understood without considering its place in the relational whole of its parent collection Khayyam's Robaiyat is found to be as a critique of fatalistic astrology his most important scientific work in astronomy rendered in poetic form Studying Khayyam's scientific works in relation to those of other scientists out of the context of his own philosophical theological and astronomical views would be like comparing the roundness of two fruits while ignoring that they are apples and oranges Khayyam was a relational holistic and self including objective thinker being systems and causal chains discerning creative transdisciplinary transcultural and applied in method He applied a poetic geometric imagination to solving algebraic problems and his logically methodical thinking did not spare even Euclid of criticism His treatise on Euclid unified numerical and magnitudinal notions of ratio and proportionality by way of broadening the notion of number to include both rational and irrational numbers transcending its Greek atomistic tradition Khayyam's classification of algebraic equations being capped at cubic types tells of his applied scientific intentions that can be interpreted in the context of his own Islamic philosophy and theology as an effort in building an algebraic and numerical theory of everything that is not only

symbolic of body's three dimensions but also of the three foldness of intellect soul and body as essential types of a unitary substance created by God to evolve relatively on its own in a two fold succession order of coming from and going to its Source Although the succession order poses limits as captured in the astrological imagination existence is not fatalistic Khayyam's conceptualist view of the human subject as an objective creative force in a participatory universe allows for the possibility of human self determination and freedom depending on his or her self awakening a cause for which the Robaiyat was intended Its collection would be a balanced unity of wisdom gems ascending from multiplicity toward unity using Wine and various astrological geometrical numerical calendrical and musical tropes in relationally classified quatrains that follow a logical succession order
