In the Lion's Mouth Omar H. Ali, 2011-02-03 Following the collapse of Reconstruction in 1877 African Americans organized a movement distinct from the white Populist movement in the South and parts of the Midwest for economic and political reform Black Populism Between 1886 and 1898 tens of thousands of black farmers sharecroppers and agrarian workers created their own organizations and tactics primarily under black leadership As Black Populism grew as a regional force it met fierce resistance from the Southern Democrats and constituent white planters and local merchants African Americans carried out a wide range of activities in this hostile environment They established farming exchanges and cooperatives raised money for schools published newspapers lobbied for better agrarian legislation mounted boycotts against agricultural trusts and business monopolies carried out strikes for better wages protested the convict lease system segregated coach boxes and lynching demanded black jurors in cases involving black defendants promoted local political reforms and federal supervision of elections and ran independent and fusion campaigns Growing out of the networks established by black churches and fraternal organizations Black Populism found further expression in the Colored Agricultural Wheels the southern branch of the Knights of Labor the Cooperative Workers of America the Farmers Union and the Colored Farmers Alliance In the early 1890s African Americans together with

their white counterparts launched the People's Party and ran fusion campaigns with the Republican Party. By the turn of the century Black Populism had been crushed by relentless attack, hostile propaganda and targeted assassinations of leaders and foot soldiers of the movement. The movement's legacy remains though as the largest independent black political movement until the rise of the modern civil rights movement.

Achieving Blackness Algernon Austin, 2006-04-10

Achieving Blackness offers an important examination of the complexities of race and ethnicity in the context of black nationalist movements in the United States. By examining the rise of the Nation of Islam, the Black Power Movement of the 1960s and 1970s and the Afrocentric era of the 1980s through 1990s, Austin shows how theories of race have shaped ideas about the meaning of Blackness within different time periods of the twentieth century. Achieving Blackness provides both a fascinating history of Blackness and a theoretically challenging understanding of race and ethnicity. Austin traces how Blackness was defined by cultural ideas, social practices and shared identities as well as shaped in response to the social and historical conditions at different moments in American history. Analyzing black public opinion on black nationalism and its relationship with class, Austin challenges the commonly held assumption that black nationalism is a lower class phenomenon. In a refreshing and final move, he makes a compelling argument for rethinking contemporary theories of race away from the current fascination with physical difference, which he contends sweeps race back to its misconceived biological underpinnings. Achieving Blackness is a wonderful contribution to the sociology of race and African American Studies.
