Aldo Leopold's *A Sand County Almanac* 1949 Rachel Carson's *The Sea around Us* 1951 Edward Abbey's *Desert Solitaire* 1968 Annie Dillard's *Pilgrim at Tinker Creek* 1974 Terry Tempest Williams's *Refuge* 1991 Robin Wall Kimmerer's *Braiding Sweetgrass* 2013 and J. Conceptual Breakthroughs in Ethology and Animal Behavior Michael D. Breed, 2017-01-25 *Conceptual Breakthroughs in Ethology and Animal Behavior* highlights through concise summaries the most important discoveries and scientific revolutions in animal behavior. These are assessed for their relative impact on the field and their significance to the forward motion of the science of animal behavior. Eighty short essays capture the moment when a new concept emerged or a publication signaled a paradigm shift. How the new understanding came about is explained and any continuing controversy or scientific conversation on the issue is highlighted. Behavior is a rich and varied field drawing on genetics, evolution, physiology, and ecology to inform its principles, and this book embraces the wealth of knowledge that comes from the unification of these fields around the study of animals in motion. The chronological organization of the essays makes this an excellent overview of the history of animal behavior, ethology, and behavioral ecology. The work includes such topics as Darwin's role in shaping the study of animal behavior, the logic of animal contests, cognition, empathy in animals, and animal personalities. Succinct accounts of new revelations about behavior through scientific investigation and scrutiny reveal the fascinating story of this field. Similar to Dr. John Avise's *Contemporary Breakthroughs in Evolutionary Genetics*, the work is structured into vignettes that describe the conceptual revolution and assess the impact of the conceptual change with a score which ranges from 1 to 10, providing an assessment of the impact of the new findings on contemporary science. Features a lively, brisk writing style and brief entries to enable easy, enjoyable access to this essential information. Includes topics that cover the range of behavioral biology from mechanism to behavioral ecology. Can also be used as supplemental material for an undergraduate animal behavior course or as the foundational text for an upper-level or graduate discussion course in advanced animal behavior

Creatures of Cain Erika Lorraine Milam, 2018-12-11 How Cold War America came to attribute human evolutionary success to our species' unique capacity for murder. After World War II, the question of how to define a universal human nature took on new urgency. *Creatures of Cain* charts the rise and precipitous fall in Cold War America of a theory that attributed man's evolutionary success to his unique capacity for murder. Drawing on a wealth of archival materials and in-depth interviews, Erika Lorraine Milam reveals how the scientists who advanced this "killer ape" theory capitalized on an expanding postwar market in intellectual paperbacks and widespread faith in the power of science to solve humanity's problems, even to answer the most fundamental questions of human identity. The "killer ape" theory spread quickly from colloquial science publications to late-night television, classrooms, political debates, and Hollywood films. Behind the scenes, however, scientists were sharply divided; their disagreements centering squarely on questions of race and gender. Then, in the 1970s, the theory unraveled altogether when primatologists

discovered that chimpanzees also kill members of their own species While the discovery brought an end to definitions of human exceptionalism delineated by violence Milam shows how some evolutionists began to argue for a shared chimpanzee human history of aggression even as other scientists discredited such theories as sloppy popularizations A wide ranging account of a compelling episode in American science *Creatures of Cain* argues that the legacy of the killer ape persists today in the conviction that science can resolve the essential dilemmas of human nature
