The Nature And Truth Of The Great Religions

James Freeman Clarke

The Nature And Truth Of The Great Religions:

The Nature and Truth of the Great Religions August Karl Reischauer, 1983 **Nature and Truth of the Great Religions** August Karl Reischauer, 1966 **The Nature and Truth of the Great Religions: Towards a Philosophy of Religion** A. K. Reischauer, 1967 *Great Religions of the Modern World* Edward Jabra Jurji, 2015-12-08 Here is the answer to the desire of many thoughtful laymen for an intelligent appraisal of the great contemporary faiths This is not a reference book but a group of essays for the general reader on the idea the spiritual core of the chief religions of the modern day Each essay is written simply and objectively by an eminent scholar with the authority that is the fruit of a lifetime study of his subject Fidelity to the classical tenets of each religion and a desire to permit each to speak for itself are salient features of the work of these men They collaborated on the fundamental outline of the book with the result that it is well integrated not a random collection of articles Recent events in China Palestine India Indonesia Japan and many other parts of the globe lend a special interest to the subject at this time but this is not a book on current events It takes a larger view and is a study of religion in its widest connotations as a potent force in history and as a meaningful influence in the world today Originally published in 1946 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **The Nature and Truth of the Great Religions** August Karl Reischauer, 1968 **Ten Great Religions** James Freeman Clarke, 2025-09-21 Reprint of the original first published in 1883 The Antigonos publishing house specialises in the publication of reprints of historical books We make sure that these works are made available to the public in good condition in order to preserve their cultural heritage *Ten Great Religions: An Essay in Comparative Theology* James Freeman Clarke, 2020-09-28 The present work is what the Germans call a Versuch and the English an Essay or attempt It is an attempt to compare the great religions of the world with each other When completed this comparison ought to show what each is what it contains wherein it resembles the others wherein it differs from the others its origin and development its place in universal history its positive and negative qualities its truths and errors and its influence past present or future on the welfare of mankind For everything becomes more clear by comparison We can never understand the nature of a phenomenon when we contemplate it by itself as well as when we look at it in its relations to other phenomena of the same kind The qualities of each become more clear in contrast with those of the others By comparing together therefore the religions of mankind to see wherein they agree and wherein they differ we are able to perceive with greater accuracy what each is The first problem in Comparative Theology is therefore analytical being to distinguish each religion from the rest We compare them to see wherein they agree and wherein they differ But the next

problem in Comparative Theology is synthetical and considers the adaptation of each system to every other to determine its place use and value in reference to universal or absolute religion It must therefore examine the different religions to find wherein each is complete or defective true or false how each may supply the defects of the other or prepare the way for a better how each religion acts on the race which receives it is adapted to that race and to the region of the earth which it inhabits In this department therefore it connects itself with Comparative Geography with universal history and with ethics Finally this department of Comparative Theology shows the relation of each partial religion to human civilization and observes how each religion of the world is a step in the progress of humanity It shows that both the positive and negative side of a religion make it a preparation for a higher religion and that the universal religion must root itself in the decaying soil of partial religions And in this sense Comparative Theology becomes the science of missions Such a work as this is evidently too great for a single mind Many students must co operate and that through many years before it can be completed This volume is intended as a contribution toward that end It will contain an account of each of the principal religions and its development It will be therefore devoted to the natural history of ethnic and catholic religions and its method will be that of analysis The second part which may be published hereafter will compare these different systems to show what each teaches concerning the great subjects of religious thought God Duty and Immortality Finally it will compare them with Christianity and will inquire whether or not that is capable of becoming the religion of the human race The work of Comparative Theology is to do equal justice to all the religious tendencies of mankind Its position is that of a judge not that of an advocate Assuming with the Apostle Paul that each religion has come providentially as a method by which different races should seek the Lord if haply they might feel after him and find him it attempts to show how each may be a step in the religious progress of the races and a schoolmaster to bring men to Christ It is bound however to abstain from such inferences until it has accurately ascertained all the facts Its first problem is to learn what each system contains it may then go on and endeavor to generalize from its facts Comparative Theology is therefore as yet in its infancy The same tendency in this century which has produced the sciences of Comparative Anatomy Comparative Geography and Comparative Philology is now creating this new science of Comparative Theology It will be to any special theology as Comparative Anatomy is to any special anatomy Comparative Geography to any special geography or Comparative Philology to the study of any particular language It may be called a science since it consists in the study of the facts of human history and their relation to each other It does not dogmatize it observes It deals only with phenomena single phenomena or facts grouped phenomena or laws

The Religion of Nature Delineated William Wollaston, 1722 **The Religion of Nature** Edward Kay Robinson, 1906 **The Recent Great Religious Awakening in America, and the Lessons which it Suggests** John Gordon Lorimer (D.D.), 1859
