The Navajo Lifeways Group 1:

Martial Culture in the Lifeways of US Servicemembers and Veterans Nathan J. Hogan, 2024-02-13 This book develops a new concept martial culture with which to problematize and reframe thinking surrounding the lifeways of US servicemembers by exploring the values beliefs norms and rituals they are exposed to and practice during military service By reuniting the two concepts of servicemember and veteran into one overarching cultural model the author shows how the concept of martial culture can be used to acknowledge the unbroken holistic multidimensional life cycle of an individual Adopting a comparative mythological approach and drawing upon Roman Navajo Hindu Norse and Japanese myths that speak to the lived experiences of servicemembers veterans and their families it weaves together ancient voices and contemporary servicemember experiential existences to offer new insight into the psychological experience of servicemembers It will be of strong interest to psychologists who seek to develop their treatment of veterans by understanding the unique lifeway of service without judgement and offering a balanced integrated spiritual connection while pushing back against both inaccurate assumptions of martial lifeways and the influences of industrialized secular approaches to service It will also appeal to those within the fields of military sociology and psychology **Interdisciplinary**

Collaboration for Water Diplomacy Shafiqul Islam, Kevin M. Smith, 2019-11-22 This book introduces the concept of Water Diplomacy as a principled and pragmatic approach to problem driven interdisciplinary collaboration which has been developed as a response to pressing contemporary water challenges arising from the coupling of natural and human systems The findings of the book are the result of a decade long interdisciplinary experiment in conceiving developing and implementing an interdisciplinary graduate program on Water Diplomacy at Tufts University USA This has led to the development of the Water Diplomacy Framework a shared framework for understanding diagnosing and communicating about complex water issues across disciplinary boundaries This framework clarifies important distinctions between water systems simple complicated or complex and the attributes that these distinctions imply for how these problems can be addressed In this book the focus is on complex water issues and how they require a problem driven rather than a theory driven approach to interdisciplinary collaboration Moreover it is argued that conception of interdisciplinarity needs to go beyond collaboration among experts because complex water problems demand inclusive stakeholder engagement such as in fact value deliberation joint fact finding collective decision making and adaptive management Water professionals working in such environments need to operate with both principles and pragmatism in order to achieve actionable sustainable and equitable outcomes This book explores these ideas in more detail and demonstrates their efficacy through a diverse range of case studies Reflections on the program are also included from conceptualization through implementation and evaluation This book offers critical lessons and case studies for researchers and practitioners working on complex water issues as well as important lessons for those looking to initiate implement or evaluate interdisciplinary programs to address other complex

 through generations lie at the core of a well balanced Navajo life These teachings are based on a very different perspective
 on the physical and spiritual world than that found in general American culture Din j Na nitin is an introduction to traditional
 Navajo teachings and history for a non Navajo audience providing a glimpse into this unfamiliar world and illuminating the
 power and experience of the Navajo worldview Historian Robert McPherson discusses basic Navajo concepts such as

 many traditional values and institutions are confronted by those of dominant society Using both historical and modern
 examples he shows how cultural change has shifted established views and practices and illustrates the challenge younger
