

CRIMINOLOGY

CHAPTER I

THE STUDY OF CRIMINOLOGY

Application of science to the study of crime — Criminology a hybrid science — The sciences used in criminological research — The principal branches of criminology — Sociological significance of the study of crime.

FEW subjects arouse so universal or so deep an interest as the study of crime. This interest is due in the main to the adventurous and romantic traits in human nature. Criminal conduct appeals to these human traits because it is regarded as being a spontaneous response to impulse, and even the most prosaic and conventional individual chafes to a certain extent under the restrictions of law and morality. If this interest is not so great as to become morbid, it may have great utility, because crime is both a serious practical problem and an important subject for scientific study.

During the past century the extent to which scientific methods have been applied to the study of human and social phenomena has increased greatly. To be sure, there still is much opposition to the scientific study of these phenomena. Some of this opposition arises from anthropocentric notions with regard to the exalted position of man in the universe. Some of it arises from anti-scientific theological dogmas. Some of it is due to propagandists who are eager to push through certain social reforms, and are therefore unwilling to await the results of careful and cautious scientific investigation. All of this opposition creates a prejudice against attributing human conduct to natural causes. But slowly this opposition is being overcome, and crime will before long be regarded as a purely natural phenomenon.

The New And The Old Criminology:

The New and the Old Criminology Edith E. Flynn, John Phillips Conrad, 1978 *Crime And Capitalism* David Greenberg, 2010-06-10 Classic and contemporary viewpoints on crime *Helping and Intervention* Joseph L. DeVitis, John Martin Rich, 1988 *Criminal Theory Profiles* Joshua D. Behl, Leonard A. Steverson, 2021-09-23 This book brings to life the major theories of crime and deviance by presenting detailed profiles that help readers differentiate each theory and its major propositions by better understanding how when and by whom the theory was formed Criminology is based on strong theoretical foundations that attempt to answer the question of why people commit crime Criminological theory is especially complex in that theorists come from a variety of disciplines including medicine sociology psychology economics and law While not an exhaustive list of each theorist s works nor an in depth review of the empirical work that has been done on each theory this text tracks the intellectual development of a theory by profiling the theorists who are responsible for the major ideas in criminological thought By viewing the field in the context of the social conditions of the time and the personal histories of the theorists students can better understand the intellectual history of each theory and the relationship between criminology and other fields to grasp a better appreciation of how the science of crime and the study of criminals has evolved All chapters are organized with a brief overview of the theorist and their significant ideas a biographical profile of the theorist coverage of the theoretical developments and contributions of the theorist a list of major works by the theorist and a summary detailing the overall legacy of the theorist in the field This book is ideal for courses on criminology criminological theory and criminal behavior
