Medizin ist als Referenzwerk für die Praxis konzipiert und vermittelt das notwendige Fachwissen um eine Vielzahl von Erkrankungen verlässlich zu diagnostizieren *The Wealth from Health Playbook* Douglas Ratner, Susan Walsh, 2021-04-01

Telemedicine is serving as a significant tool for our healthcare delivery system with the powerful potential to serve as a focal point to manage over 100 million chronic disease sufferers in the United States and significantly higher numbers worldwide. During this Great Pause as this period has been labeled, telemedicine consults have become a game changer in that it is easy to perform for the patient and the provider alike, cost effective and highly convenient. Average cost is much less than 100 and wait time is 4 minutes. Furthermore, it creates a platform for dovetailing a number of other innovative initiatives outlined below and discussed in detail in this book and with proven track records already. Additionally, it sets the stage beautifully for full practice transformation with significant reengineering. We have already created and tested our initiatives in real time: Primary Care Transformation with telemedicine as the hub, The Wealth from Health Navigation and Reward System, Environmental Housecall, asthmatics, Race to Zero, palliative care, Community Health Trust, social determinants, Help the Helper caregiver program, Precision Medicine and AI leverage data, High Value Care Center, diagnostic and management accuracy, Survivorship Programs, Cancer, HIV, Sickle Cell, Depression and others. *Gasping for Air* Kevin Glynn, 2017-08-03

Breathing is a continuous battle between our need for oxygen and forces in nature that attack our lungs. Three hundred thousand Americans will die of respiratory diseases this year. *Gasping for Air* is the dramatic story of how infections, toxins, carcinogens, and air pollution strike against one of our basic body functions. The book also describes how we come into the struggle with diseases like asthma, cystic fibrosis, and sleep apnea, which make us vulnerable to assaults on breathing from without and within. We have powerful weapons to defend breathing: Medical science, public health, engineering, and business all play important roles in the effort to support breathing. Yet *Gasping for Air* also reminds readers how breathing support has been at the eye of the storm in many ethical dilemmas of modern healthcare. Here Kevin Glynn, an experienced pulmonologist and lifelong asthma sufferer, tells stories about the third most common cause of premature deaths in the developed world, describes lethal forces in nature, infections, genetic predispositions, and from human activities: dusty occupations, tobacco smoking, chemical toxins, drug overdoses that threaten to suffocate us, and offers sage advice for how to prevent and address those threats and the damage they cause. **Narrative Medicine in Education, Practice, and Interventions** Anders Juhl Rasmussen, Anne-Marie Mai, Helle Ploug Hansen, 2022-11-01

Narrative medicine is a growing field of research and teaching. It arises from an interdisciplinary interest in person-centered medicine and is regarded as a major innovation in the medical humanities. This anthology is the first of its kind, which integrates chapters on legitimizing narrative medicine in education, practice, and research; on analyzing types of patient narratives; and on studying interventions applying vulnerable or shared reading, creative writing, or Socratic dialogue as a means of rehabilitation and mental care. In her foreword, Rita Charon, who originally coined the term narrative medicine, recognizes this expansion of the field and names it system narrative medicine.

Empathy and the Practice of Medicine Howard Marget Spiro, Mary G. McCrea Curnen, Enid Peschel, Deborah St. James, 1993-01-01 The book which includes essays by physicians philosophers and a nurse is divided into three parts one deals with how empathy is weakened or lost during the course of medical education and suggests how to remedy this another describes the historical and philosophical origins of empathy and provides arguments for and against it and a third section offers compelling accounts of how physicians empathy for their patients has affected their own lives and the lives of those in their care We hear for example from a physician working in a hospice who relates the ways that the staff try to listen and respond to the needs of the dying a scientist who interviews candidates for medical school and tells how qualities of empathy are undervalued by selection committees a nurse who considers what nursing can teach physicians about empathy another physician who ponders whether the desire to be empathic can hinder the detachment necessary for objective care and several contributors who show how literature and art can help physicians to develop empathy **Chinese Holistic**
