Markov Random Field Modeling in Computer Vision S.Z. Li,2012-12-06 Markov random field MRF modeling provides a basis for the characterization of contextual constraints on visual interpretation and enables us to develop optimal vision algorithms systematically based on sound principles This book presents a comprehensive study on using MRFs to solve computer vision problems covering the following parts essential to the subject introduction to fundamental theories

formulations of various vision models in the MRF framework MRF parameter estimation and optimization algorithms Various MRF vision models are presented in a unified form including image restoration and reconstruction edge and region segmentation texture stereo and motion object matching and recognition and pose estimation This book is an excellent reference for researchers working in computer vision image processing pattern recognition and applications of MRFs It is also suitable as a text for advanced courses in the subject **Computer Vision-Guided Virtual Craniofacial Surgery**

Ananda S. Chowdhury, Suchendra M. Bhandarkar, 2011-03-19 This unique text reference discusses in depth the two integral components of reconstructive surgery fracture detection and reconstruction from broken bone fragments In addition to supporting its application oriented viewpoint with detailed coverage of theoretical issues the work incorporates useful algorithms and relevant concepts from both graph theory and statistics Topics and features presents practical solutions for virtual craniofacial reconstruction and computer aided fracture detection discusses issues of image registration object reconstruction combinatorial pattern matching and detection of salient points and regions in an image investigates the concepts of maximum weight graph matching maximum cardinality minimum weight matching for a bipartite graph determination of minimum cut in a flow network and construction of automorphs of a cycle graph examines the techniques of Markov random fields hierarchical Bayesian restoration Gibbs sampling and Bayesian inference Computer Vision-ECCV '92 Giulio Sandini, 1992-04-29 This volume collects the papers accepted for presentation at the Second European Conference on Computer Vision held in Santa Margherita Ligure Italy May 19 22 1992 Sixteen long papers 41 short papers and 48 posters were selected from 308 submissions The contributions are structured into 14 sections reflecting the major research topics in computer vision currently investigated worldwide The sections are entitled features color calibration and matching depth stereo motion tracking active vision binocular heads curved surfaces and objects reconstruction and shape recognition and applications
