**Crime, Drugs and Social Theory** Chris Allen, 2017-03-02 Do criminal cultures generate drug use? *Crime, Drugs and Social Theory* critiques conventional academic and policy thinking concerning the relationship between urban deprivation, crime and drug use. Chris Allen outlines an innovative constructionist phenomenological perspective to explore these relationships in a new light. He discusses how people living in deprived urban areas develop natural attitudes towards activities such as crime and drug use that are prevalent in the social worlds they inhabit and shows that this produces forms of articulation such as 'I don't know why I take drugs, I just take them' and 'drugs come naturally to me'. He then draws on his constructionist phenomenology to help understand the natural attitude towards crime and drugs that emerge from conditions of urban deprivation as well as the non-reasoned forms of articulation that emerge from this attitude. The book argues that understanding the conditions in which drug users deviate from their natural attitude can help effective intervention in the lives of drug users.

**Environment and Social Theory** John Barry, 1999 Covering the ideas of key theorists, this text provides an introduction to the relationship between the environment and social theory, both historically and within contemporary social theory.

*Social Theory and Aging* Jason L. Powell, 2006 This book explores both conceptual and theoretical issues that impinge on understanding aging in post-modern society. It analyses how knowledge formation of aging with particular reference to old age in contemporary western society is socially constituted and positioned by powerful taken-for-granted assumptions. These assumptions have provided a power knowledge base for bio-medical disciplines, legitimacy of political economic discourses and practices of professional experts. The book is in two parts: the first part introduces modernist scientific models and theories of gerontology and questions their importance in mapping out the assumptions of aging and how they impinge on identity performance in society through disciplinary matrix of biology, psychology and social conceptualizations of gerontology; the second part focuses upon postmodern constructions of aging through the articulation and development of novel epistemologies, postmodernism and aging body discourse and power knowledge and aging in the risk society. The book addresses a key question: can meta-theories provide an effective analysis of aging which is radically different from modernist grand narratives as epitomized by not only bio-medical models of aging but also of mainstream social theories of gerontology?

by Rodney Benson 4 Rogers Brubaker Nick Crossley and John Myles Indeed it is the 1985 article by Rogers Brubaker that can truly be said to have served as one of the best introductions to Bourdieu's thought for the American social scientific public It is for this reason that we include it in the present collection Intellectual origins orientations We begin by providing an overview of Bourdieu's life as a scholar and a public intellectual The numerous obituaries and memorial tributes that have appeared following Bourdieu's untimely death have revealed something of his life and career but few have stressed the intersection of his social origins career trajectory and public intellectual life with the changing political and social context of France This is precisely what David Swartz's In memoriam attempts to accomplish In it he emphasizes the coincidence of Bourdieu's young and later adulthood with the period of decolonization the May 1968 French university crisis the opening up of France to privatization of many domains previously entrusted to the state that providence and most threatening to post World War II reforms the emergence of globalization as the hegemonic structure of the 21st century An orienting theme throughout Bourdieu's work warns against the partial and fractured views of social reality generated by the fundamental subject object dichotomy that has plagued social science from its very beginning
