**Imperfect Histories** Ann Rigney, 2018-09-05 Imperfect Histories puts imperfection at the heart of a theory of historical representation Ann Rigney shows how historical writing involves dealing with intractable subjects that resist our efforts to know and to shape them Those who write history she says engage in an ongoing struggle to

match up what they find relevant in the past with the information and interpretive models at their disposal Chronic dissatisfaction is at the heart of historical practice This is especially evident in the various attempts made over the last two centuries to write an alternative history of everyday experience Focusing on historical writing in the last decades of the eighteenth century and the first half of the nineteenth Rigney analyzes a wide range of works by Walter Scott Jules Michelet Augustin Thierry and Thomas Carlyle She shows how the attempt to write an alternative history brought historical writing into a close yet fraught relationship with literature The result is a new account of that relationship as it took shape in the romantic period and as it continues to influence contemporary practices *The History of Cartography, Volume 6* Mark Monmonier, 2015-05-18 For more than thirty years the History of Cartography Project has charted the course for scholarship on cartography bringing together research from a variety of disciplines on the creation dissemination and use of maps Volume 6 Cartography in the Twentieth Century continues this tradition with a groundbreaking survey of the century just ended and a new full color encyclopedic format The twentieth century is a pivotal period in map history The transition from paper to digital formats led to previously unimaginable dynamic and interactive maps Geographic information systems radically altered cartographic institutions and reduced the skill required to create maps Satellite positioning and mobile communications revolutionized wayfinding Mapping evolved as an important tool for coping with complexity organizing knowledge and influencing public opinion in all parts of the globe and at all levels of society Volume 6 covers these changes comprehensively while thoroughly demonstrating the far reaching effects of maps on science technology and society and vice versa The lavishly produced volume includes more than five hundred articles accompanied by more than a thousand images Hundreds of expert contributors provide both original research often based on their own participation in the developments they describe and interpretations of larger trends in cartography Designed for use by both scholars and the general public this definitive volume is a reference work of first resort for all who study and love maps *Demon* Matt Wesolowski, 2021-11-20 Scott King's podcast investigates the 1995 cold case of a demon possession in a rural Yorkshire village where a 12 year old boy was murdered in cold blood by two children Book six in the chilling award winning Six Stories series \_\_\_\_\_ In 1995 the picture perfect village of Ussalthwaite was the site of one of the most heinous crimes imaginable in a case that shocked the world Twelve year old Sidney Parsons was savagely murdered by two boys his own age No reason was ever given for this terrible crime and the Demonic Duo who killed him were imprisoned until their release in 2002 when they were given new identities and lifetime anonymity Elusive online journalist Scott King investigates the lead up and aftermath of the killing uncovering dark and fanciful stories of demonic possession and encountering a village torn apart by this unspeakable act And as episodes of his Six Stories podcast begin to air King himself becomes a target with dreadful secrets from his own past dredged up and threats escalating to a terrifying level It becomes clear that whatever drove those two boys to kill is still there lurking and the campaign of horror has just begun \_\_\_\_\_
