Ghostbox Walter R. Jacobs, 2007 Two years after Walter R Jacobs was forced to call his new stepmother Mom she cancelled what would have been his 13th Christmas In the memoir Ghostbox Jacobs explores a life where family problems are blamed on disrespectful children who refused to accept Mom s authority His stepmother is a sociological ghost a force that limited his thoughts and decisions until he filled a special shoebox with objects that evoke significant memories good bad and ugly This ghostbox has rendered his stepmother s seething presence benign Jacobs investigates how just a relatively short stay in his stepmother s house seven years with his stepmother father and younger brother led to almost twenty years of questions about multiple facets of his identity such as the proper rules and rhythms of life as an African American college professor In the end he finds the key to finally and completely breaking away from the dysfunctions that threatened his self esteem and ability to interact normally with others Jacobs includes an appendix of guidelines readers may use to create their own ghostboxes He invites readers into a world where they can reflect on troubling aspects of their lives and create strategies for making empowering changes

**Earning and Learning** Susan E. Mayer, Paul E. Peterson, 2010-12-01 A Brookings Institution Press and Russell Sage Foundation publication Education is one of the largest sectors of the U S economy yet scholars educators policymakers and parents do not agree about what the money spent on education really buys In particular they do not agree on how much education improves children s ability to learn or whether the things children learn in school truly improve their chances for success as adults If schooling increases how much students know and what they know does pay off later then it is important to ask what schools can do to increase students learning and earning The essays in this book report estimates of the effects of learning on earnings and other life outcomes They also examine whether particular aspects of schooling such as the age at which children begin school classroom size and curriculum or structural reform such as national or statewide examinations or school choice affect learning Taken together their findings suggest that liberals are correct in saying that more investment is needed in early education that class sizes should be further reduced and that challenging national or state standards should be established But they also provide support for conservatives who ask for a more demanding curriculum and greater school choice Contributors include John Bishop Eric Hanushek James Heckman Christopher Jencks Caroline Minter Hoxby Fred Mosteller and Christopher Winship
