Uzgiris, 2012-12-06 The articles which make up this book were all expressly written to honor a remarkable man and a remarkable psychologist Joseph McVicker Hunt on the occasion of his 70th birthday The contributors

to this volume with the exception of Hunt's teacher J. P. Guilford are students and colleagues of Hunt's whose intellectual and professional paths have crossed his in some significant way. In terms of content the contributions collectively range across many of the conventional boundaries that demarcate the territories into which psychological subject matter has been divided. In so doing they remain faithful to the man they honor for whom such boundaries have had at best only provisional reality. Yet as the introductory chapter attempts to make clear there is a unifying theme that lies behind the apparent diversity of Hunt's work. While we wished to mark Hunt's specific contributions to the diverse areas represented in this book we also hoped to capture the unity of viewpoint that ties them together.

Individual Learners W. Ray Crozier, 2013-04-03 No two learners are the same. They take different approaches to learning tasks and they respond to formal education in different ways. Yet the current emphasis in education is on what is common to learners from a common curriculum to a common teaching method. *Individual Learners* reviews and discusses recent research that shows that differences in personality contribute significantly to children's and adults' experiences of success and failure in education. *Individual Learners* considers fundamental issues in the study of personality and provides an up to date review and evaluation of the continuing nature nurture debate. It then examines five traits that can have an impact upon learning aggressiveness anxiety achievement motivation self confidence and shyness. The book provides an accessible account of the recent research into the links between personality and education and its implications for educational practice. It will be invaluable to anyone with an interest in education whether students teachers or lecturers.
