Test Of War Inside Britain 1939-45:

The Test of War Robert Mackay, 2003 Robert Mackay provides an up to date examination of the British home front and the country's experience of war 1939-1945 Cinemas and cinemagoing in wartime Britain, 1939-45 Richard Farmer, 2016-06-24 In this groundbreaking book Richard Farmer provides a social and cultural history of cinemas and cinemagoing in Britain between 1939 and 1945 and explores the impact that the war had on the places in which British people watched films *Sport and the Home Front* Matthew Taylor, 2020-05-31 Sport and the Home Front contributes in significant and original ways to our understanding of the social and cultural history of the Second World War It explores the complex and contested treatment of sport in government policy media representations and the everyday lives of wartime citizens Acknowledged as a core component of British culture sport was also frequently criticised marginalised and downplayed existing in a constant state of tension between notions of normality and exceptionality routine and disruption the everyday and the extraordinary The author argues that sport played an important yet hitherto neglected role in maintaining the morale of the British people and providing a reassuring sense of familiarity at a time of mass anxiety and threat Through the conflict sport became increasingly regarded as characteristic of Britishness a symbol of the ordinary everyday lives in defence of which the war was being fought Utilised to support the welfare of war workers the entertainment of service personnel at home and abroad and the character formation of schoolchildren and young citizens sport permeated wartime culture contributing to new ways in which the British imagined the past present and future Using a wide range of personal and public records from diary writing and club minute books to government archives this book breaks new ground in both the history of the British home front and the history of sport **The British Army and the People's War, 1939-1945** Jeremy A. Crang, 2000-11-18 During the Second World War the British army absorbed approximately three million new recruits the majority of whom were conscripts Drawn from all occupational groups and social classes the military authorities were confronted with the task of molding these civilians in uniform into an effective fighting force This book analyzes the impact of this process of integration on the army as a social institution Exploring such aspects of the army's social organization as other rank selection officer selection officer promotion officer man relations the soldier's working life army welfare and army education it assesses the ways in which the army changed in relation to its new intake what the extent of any change that took place actually was and how different the army of 1945 was to that of 1939 A Guide to British Military History Ian F. W. Beckett, 2016-06-30 What exactly is military history Forty years ago it meant battles campaigns great commanders drums and trumpets It was largely the preserve of military professionals and was used to support national history and nationalism Now though the study of war has been transformed by the war and society approach by the examination of identity memory and gender and a less Euro centric and more global perspective Generally it is recognised that war and conflict must be integrated into the wider narrative of historical development and this is why Ian Beckett's

research guide is such a useful tool for anyone working in this growing field. It introduces students to all the key debates, issues and resources. While European and global perspectives are not neglected, there is an emphasis on the British experience of war since 1500. This survey of British military history will be essential reading and reference for anyone who has a professional or amateur interest in the subject and it will be a valuable introduction for newcomers to it. **The Shock of War** Sean Kennedy, 2011-01-01. In *The Shock of War: Civilian Experiences 1937-1945*, Sean Kennedy shifts the reader's focus from the battlefields of the Second World War to the civilian experience. This short yet comprehensive history complements existing studies of the war that document diplomatic and military operations. While many of these studies acknowledge the significance of the conflict for civilians, *The Shock of War* places civilians at the centre of events, drawing attention to the many different regions of the world affected by the conflict and comparing various facets of the civilian experience. Kennedy's fresh approach emphasizes the diverse and complex impact of the war, which was profoundly destructive yet in some societies provided opportunities and the potential for positive change. *At Home and under Fire* Susan R. Grayzel, 2012-01-09. Although the Blitz has come to symbolize the experience of civilians under attack, Germany first launched air raids on Britain at the end of 1914 and continued them during the First World War. With the advent of air warfare, civilians far removed from traditional battle zones became a direct target of war rather than a group shielded from its impact. This is a study of how British civilians experienced and came to terms with aerial warfare during the First and Second World Wars. Memories of the World War I bombings shaped British responses to the various real and imagined war threats of the 1920s and 1930s, including the bombing of civilians during the Spanish Civil War and ultimately the Blitz itself. The processes by which different constituent bodies of the British nation responded to the arrival of air power reveal the particular role that gender played in defining civilian participation in modern war. **Millions Like Us?** Visiting Senior Fellow, Department of Psychology, Nicky Hayes, 1999-01-01. This collection of essays brings together the latest historical research on cultural production and reception during the Second World War. It covers the way in which cultural provision was viewed by the labour movement and industry. **War and welfare** Barbara Hatley, 2013-07-19. During the Second World War, some 250,000 British servicemen were taken captive by either the Axis powers or the Japanese. As a result of this, their wives and families became completely dependent on the military and civil authorities. This book examines the experiences of the millions of service dependents created by total war. The book then focuses on the most disadvantaged elements of this group: the wives, children and dependents of men taken prisoner, and the changes brought about by the exigencies of total war. Further chapters reflect on how these families organised to lobby government and the strategies they adopted to circumvent apparent bureaucratic ineptitude and misinformation. This book is essential reading for both academic and general readers interested in the British Home Front during the Second World War. *Museums in the Second World War* Catherine Pearson, 2017-06-26. Exploring the role of museums, galleries and curators during the upheaval of the Second

World War this book challenges the accepted view of a hiatus in museum services during the conflict and its immediate aftermath. Instead it argues that new thinking in the 1930s was realised in a number of promising initiatives during the war, only to fail during the fragmented post-war recovery. Based on new research including interviews with retired museum staff, letters, diaries, museum archives and government records, this study reveals a complex picture of both innovation and inertia. At the outbreak of war, precious objects were stored away and staff numbers reduced, but although many museums were closed, others successfully campaigned to remain open. By providing innovative modern exhibitions and education initiatives, they became popular and valued venues for the public. After the war, however, museums returned to their more traditional collections-centred approach and failed to negotiate the public funding needed for reconstruction based on this narrower view of their role. Hence, in the longer term, the destruction and economic and social consequences of the conflict served to delay aspirations for reconstruction until the 1960s. Through this lens, the history of the museum in the mid-twentieth century appears as one shaped by the effects of war but equally determined by the input of curators, audiences and the state. The museum thus emerges not as an isolated institution concerned only with presenting the past but as a product of the changing conflicts and cultures within society.
