## **Situating Sound And Rhythm:**

**Sound Worlds from the Body to the City** Ariane Wilson, 2019-03-13 This volume reveals the extent to which aural perception influences our spatial awareness. Spanning various fields and practices from psychology to geography and from zoology to urban planning it covers a range of environments in which sounds contribute to forming our sense of space and place. The contributions gathered here lead from the mother's womb through the habitats of insects and owls to the resonating bodies of buildings and the city to artistic endeavours that aim to consciously reveal the spatiality of sound. In this progression the book demonstrates the profoundly constitutive role of hearing and listening at all stages of our biological and social development as well as the epistemological, phenomenological and emotional importance of sound in relation to our construction of space. As such it will appeal not only to architects, town planners and artists but also to the growing community of scientists and scholars intrigued by sonic issues. Differing from both quantitative acoustics and sound design its approach opens new perspectives on the sonic dimension and aural understanding of our environment by tracing analogies between a diversity of spaces formed when sound interacts with listening as a mode of attention.

**The Art of Theatrical Sound Design** Victoria Deiorio, 2018-09-20 Emphasising the artistry behind the decisions made by theatrical sound designers this guide is for anyone seeking to understand the nature of sound and how to apply it to the stage. Through tried and tested advice and lessons in practical application The Art of Theatrical Sound Design allows developing artists to apply psychology, physiology, sociology, anthropology and all aspects of sound phenomenology to theatrical sound design. Structured in three parts the book explores theoretically how human beings perceive the vibration of sound, offers exercises to develop support for storytelling by creating an emotional journey for the audience, considers how to collaborate and communicate as a theatre artist and discusses how to create a cohesive sound design for the stage.

**Geographies of Rhythm** Tim Edensor, 2016-04-15 In Rhythmanalysis Henri Lefebvre put forward his ideas on the relationship between time and space, particularly how rhythms characterize space. Here leading geographers advance and expand on Lefebvre's theories, examining how they intersect with current theoretical and political concerns within the social sciences. In terms of geography, rhythmanalysis highlights tensions between repetition and innovation, between the need for consistency and the need for disruption. These tensions reveal the ways in which social time is managed to ensure a measure of stability through the instantiation of temporal norms, whilst at the same time showing how this is often challenged. In looking at the rhythms of geographies and drawing upon a wide range of geographical contexts this book explores the ordering of different rhythms according to four main themes: rhythms of nature, rhythms of everyday life, rhythms of mobility and the official and routine rhythms which superimpose themselves on the multiple rhythms of the body.

**Sonic Interventions** Sylvia Mieszkowski,Joy Smith,Marijke de Valck,2015-07-14 Sonic Interventions makes a compelling case for the importance of sound in theorizing literature subjectivity and culture Sound is usually understood as our second sense and as our belief in a visually dominated culture prevails remains of secondary interest Western cultures are considered to be predominantly visual while other societies are thought to place more importance on the acoustic dimension This volume questions these assumptions by examining how sound differs from and acts in relationship to the visual It moves beyond theoretical dichotomies between the visual and the sonic the oral and literature and instead investigates sonic interventions in their often multi faceted forms The case studies deal with political appropriations of music and sounds they explore the poetic use of the sonic in novels and plays they develop theoretical concepts out of sonic phenomena and pertain to identity formation and the practice of mixing in hip hop opera and dancehall sessions Ultimately the book brings to the fore what roles sound may play for the formation of gendered identity for the stabilization or questioning of race as a social category and the conception of place Their intricate interventions beckon critical attention and offer rich material for cultural analysis

how audio visual methods can get at rhythm beyond the capacity of the senses to perceive it In particular the book includes detailed discussion of research on different forms of mobility from driving to dancing and on the social life of markets from finance to fish Dawn Lyon highlights the gains limitations and lively potential of rhythmanalysis for spatially temporally and sensually attuned practices of research This engaging text will be of interest to students and researchers in sociology criminology socio legal studies geography urban studies architecture anthropology economics and cultural studies *The Sound of Writing* Christopher Cannon, Steven Justice, 2023-11-14 This work provides an interdisciplinary and historical exploration of various techniques leveraging writing in order to capture sound Collectively the essays in this work focus on questions of language and expression as much as the method and theory of both sound and writing
