*Traffication* Paul Donald, 2023-05-30 Traffication develops a bold new idea that the trillions of miles of driving we do each year are just as destructive to our natural environment as any of the better known threats such as habitat loss or intensive farming The problem is not simply one of roadkill the impacts of roads are far more pervasive and they impact our wildlife in many subtle and unpredictable ways Using the latest research the book reveals how road traffic shatters essential biological processes affecting how animals communicate move around feed reproduce and die Most importantly it shows that the influence of traffic extends well beyond the verge and that a busy road can strip the wildlife from our countryside for miles around In the UK almost nowhere is exempt from this environmental toll Yet the final message here is one of hope by identifying the car as a major cause of the catastrophic loss of wildlife the solutions to our biodiversity crisis suddenly become much clearer The first step to solving any problem is to recognise that it exists in the first place But with road traffic we are not even at that crucial initial stage in our recovery Quite simply Traffication does for road traffic what Silent Spring did for agrochemicals awakening us from our collective road blindness and opening up a whole new chapter in conservation This urgent book is an essential contribution to the debate on how we restore the health of our countryside and of our own minds and bodies

the arrival of the horse marked a turning point in military and cultural practices introduced initially by invaders who relied on the animal for their chariots Unlike the regions of Asia and Egypt where chariot warfare flourished on vast plains Greece's rugged terrain and limited pasture made widespread chariot use and horse breeding challenging The imported horses were generally small spirited animals suited to the compact plains of Greece and the needs of the noble classes who primarily maintained them Greek mythology and early art reflect this special status horses appear often in scenes of hunting or chariot racing as seen in Mycenaean seal stones but rarely in depictions of mounted riders indicating that horseback riding was still uncommon Over time as grazing land limitations persisted many horses had to be imported from more fertile regions and domestic breeding was confined largely to a wealthy elite By the 8th century B C significant changes began to reshape Greek society military tactics and horsemanship Influences from Mesopotamia Asia Minor and Egypt combined with internal shifts pushed Greek warfare from noble chariot duels toward phalanx style infantry combat accessible to a broader social class Additionally the reintroduction of eastern goods the Phoenician alphabet and orientalizing art motifs sparked a cultural renaissance that coincided with Greece's expanding use of horses now more often as mounts This shift toward horseback riding gained public interest exemplified by the establishment of mounted horse races at the Olympic Games in 648 B C Yet even as riding gained popularity the skill remained secondary to the noble class's dedication to the chariot horses whether ridden or driven continued to symbolize status and power in Greek society a tradition that shaped the evolution of horsemanship in classical Greece This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1961      **Annual Iowa Year Book of Agriculture** Iowa.
