Thailand The Institutional And Political Underpinnings Of Growth:

Thailand : the institutional and political underpinnings of growth Scott Christensen, David Dollar, Ammar Siamwalla, Pakorn Vichyanond, 1993 **Thailand** , 1993-01-01 Why has public policy had only an indirect impact on Thailand's considerable development? NULL This comprehensive report points to policy differences within the country's government. First it describes macroeconomic policies that advanced private enterprises, promoted universal education and created productive state-owned companies. Then the report compares these policies with government interventions that until recently heavily favored capital intensive industries over agriculture and labor intensive manufacturing. Thailand's successful economic adjustment program is also examined. This program produced double digit growth rates in the late 1980s by opening trade, expanding labor intensive exports and encouraging foreign direct investment. *Thailand* , 1993 **The Lessons of East Asia** Danny M. Leipziger, Vinod Thomas, 1993-01-01 East Asian policies that fostered economic growth, reduced poverty and raised living standards are the main theme of this cogent overview. Seven newly industrialized economies (NIEs) are described and compared. They are Hong Kong, Indonesia, Korea, Malaysia, Singapore, Taiwan and Thailand. These country studies examine the macroeconomic policies common to NIEs. They review the highly flexible government interventions that succeeded in developing key industries and the more aggressive interventions that led to failure. The role foreign direct investment plays in producing dramatic growth is also discussed. Also available in Spanish. ISBN 0 8213 2743 7 Stock No 12743 **The Changing Politics of Finance in Korea and Thailand** Xiaoke Zhang, 2003-08-29 This book represents the first systematic attempt to explore the financial crisis in an interdisciplinary and comparative perspective and is essential reading for both policy makers and academics interested in national governance. Thailand's Growth Path Kaspar Richter, 2006 Thailand is one of the most successful developing countries. After decades of rapid growth, the economy rebounded quickly from the 1997-98 Asian crisis and is set to continue its expansion into the future. Nevertheless, there are doubts about the resilience of the Thai economy. The country appears to be on a lower growth projectory now than before the crisis. What growth can Thailand realistically expect? And what can the government do to sustain such growth into the future? Using a new methodology for identifying binding constraints to growth, Rodrik (2004) and Hausmann and others (2005) the author argues that Thailand's challenge is to maintain growth levels of 4 to 5 percent over the medium term. To achieve this goal, Thailand needs to continue its efforts of improving business infrastructure, trade integration and skills, as well as intensifying its governance reforms. World Bank web site Economic Growth and Political Change in Asia Graham Field, 2016-07-27 This book looks at the main factors which have contributed to the strikingly strong growth of Asian economies in the last twenty-five years. It considers the economic policies adopted to promote such growth, arguing that it will become increasingly difficult to sustain this. The author then examines the inequalities generated by economic growth, before considering the dynamics of the four different types of political system which have evolved in Asia: veiled authoritarianism.

Raquiza, 2013-06-17 Why do some small developing countries industrialize and others don't? What factors account for different economic performance among states that are vulnerable to external shocks crony capitalism and political instability This book argues that the answer lies in the structuring of state power specifically the way different sets of governing elites political leaders and economic technocrats are embedded in political organisations and state institutions and the way these elites relate to each other in the economic development policy process Conducting a comparative historical analysis of Thailand and the Philippines the book argues that the institutional settings of governing elites influence economic outcomes In Thailand political power traditionally connects to state institutions in ways that has limited the impact of political turnovers and global downturns conducive to long term industrial activities In contrast Philippine state power derives from family networks that merge social and political power suited to fast moving short term commercial interests In focusing on this political and institutional story the author analyses the current development dilemmas of countries weighed down by historical legacies of unstable regimes dependency and social conflict and how they are likely to develop in the future **The Anti-Development State** Walden
