British Medical Journal , 1914 **Phenomenological Approaches to Religion and Spirituality** Essien, Essien D., 2021-01-29 There is an interesting knowledge trajectory that God remains incomprehensible not imperceptible This lends credence to the fact that religious study since the Enlightenment has dedicated itself almost entirely to the problem of reconciling the non existence of God in the physical world with his necessary existence in the metaphysical world When seriously examined it would be discovered that these two aspects are logically contradictory and this is a problem with no solution But interpreting God not as a physical being but as a phenomenological thing changes the nature of the problem enough that a solution emerges almost automatically In this phenomenological model the crux of the matter is that God does not exist but God is real Therefore it is imperative to return to experience and verifiability hence purging it of unexamined and often hidden assumptions Phenomenological Approaches to Religion and Spirituality brings together the different disciplines and research approaches to provide a comprehensive analysis of the phenomenology of God and spirituality as well as offering an effective epistemological apparatus capable of dealing with this concept The book employs multidisciplinary approaches from religious studies theology philosophy anthropology and other segments to dissect the subject matter for efficient evaluation and all inclusive findings While covering various aspects of religion such as the testaments of the Bible the church the religious experience and various aspects of spirituality this book is intended for theologians philosophers religious leaders policymakers academicians researchers students public institutions and agencies with a special interest in religious matters values knowledge and truth **The Commercial Grower** , 1925 *Wood Deterioration, Protection and Maintenance* Ladislav Reinprecht, 2016-10-17 WOOD DETERIORATION PROTECTION AND MAINTENANCE Wood has low embodied energy is a renewable resource and can perform extremely well in a range of construction applications so it is not surprising that there is growing interest in the use of wood in new buildings As a natural material wood can be subject to degradation by a range of environmental factors insects bacteria or fungi Advances in the
