The Shamanic Themes in Georgian Folktales Elliot D. Cohen, 2009-03-26 In Marxist anthropological theory shamanism represented one of the early forms of religion that later gave rise to more sophisticated beliefs in the course of human advancement The premise of Marxism was that eventually at the highest levels of civilization the sacred and religion would eventually die out Znamenski 2007 p 322 Though history has of course since disproved this the theory clearly had a great bearing on what was written in the former Soviet Union about shamanism and also on people's attitudes in the former Soviet Republics towards such practices On the other hand it has been suggested that all intellectuals driven by nationalist sentiments directly or indirectly are always preoccupied with searching for the most ancient roots of their budding nations in order to ground their compatriots in particular soil and to make them more indigenous Znamenski 2007 p 28 Although this might apply to searching for the roots of Christianity in Georgia when it comes to searching for the roots of pagan practices interest on the part of the people of Georgia is generally speaking not so forthcoming This impasse coupled with the effects of the repressions against religions including shamanism unleashed by the Soviet government between the 1930s and 1950s along with the recent surge of interest in the Georgian Orthodox church a backlash to the seventy years of officially sanctioned atheism makes research into the subject no easy business However hopefully this study will at least in some small way help to set the process in motion

Bureau, Ruth S. Bloodgood, 1935 Encoding Events Xuhui Hu, 2018-09-04 This volume presents theoretical and empirical research on the syntax of events within the broader framework of generative grammar focusing on the central question of how conceptual meaning interacts with narrow syntactic computation Xuhui Hu proposes a set of integration conditions that require the content of the predicate to be licensed by theta role information generated by narrow syntax The other principal theoretical component of the book concerns the functional structure of events which is related to issues such as the parallel between the event and nominal domains the mapping of a predicate onto an entity and the grammatical foundation of verb classification The framework is applied to three areas the syntax of resultatives in English and Chinese cross linguistic and diachronic variation in resultatives and applicative constructions The findings shed light on the thematic relationship between core arguments and predicates and on the syntax of non core arguments contribute to the theory of parametric variation in the generative tradition and provide insights into the verb framed vs satellite framed typology **Measure for measure ; Much ado about nothing ; Midsummer night's dream ; Love's labour's lost** William Shakespeare, Henry Norman Hudson, 1864 The Complete Works of William Shakespeare William Shakespeare, Henry Norman Hudson, 1851
