*The Changing Faces of Ireland* Merike Darmody, Naomi Tyrrell, Steve Song, 2011-10-22 Before the economic boom of the 1990s Ireland was known as a nation of emigrants. The past fifteen years however have seen the transformation of Ireland from a country of net emigration to one of net immigration on a scale and at a pace unprecedented in comparative context. As a result Irish society has become more diverse in terms of nationality, language, ethnicity and religious affiliation and these changes are now clearly reflected in the composition of both primary and secondary schools presenting these with challenges as well as opportunities. Despite the increased number of ethnically diverse immigrant children and young people in the Ireland currently there is a paucity of information about aspects of their lives in Ireland. This book is aimed at contributing to this gap in knowledge. This edited collection will be of interest to researchers in the fields of migration studies, childhood studies, education studies, human geography, sociology, applied social studies, social work, health studies and psychology. It will also be a useful resource to educators, social workers, youth workers and community members working with or preparing to work with children with immigrant and ethnic minority backgrounds in Ireland.

*Teaching and Learning Chinese as a Second or Foreign Language* Ko-Yin Sung, 2019-10-23. *Teaching and Learning Chinese as a Second or Foreign Language* edited by Ko Yin Sung addresses three emerging themes in the field of Chinese language teaching and learning: 1. Increasingly ubiquitous in all language learning and teaching and for the learning of Chinese as a second language in particular, information and communication technology (ICT) can serve as an important and effective tool. Several chapters focus on how certain emerging ICT tools are applied in teaching and learning Chinese as a second language. 2. Due to China's economic and political influence, the number of students of all ages studying Chinese as a second language but especially young learners has increased in many parts of the world. Despite this, the research into teaching Chinese to young learners has lagged behind. Several chapters investigate young learners' motivations and effective methods for assisting them to master the Chinese language. 3. The writing system of the Chinese language poses many challenges for learners, especially those more familiar with alphabetical languages. In light of this difficulty in learning Chinese characters, some of the chapters identify effective teaching and learning strategies to master the Chinese language.
