The Guilty Environmentalist:

The Guilty Environmentalist Arthur O'Donnell, 2003 The Guilty Environmentalist is a collection of essays musings and political fantasies from award winning humorist and energy journalist Arthur O'Donnell Join the Guilty Environmentalist as he trips lightly through this exploration of the history and foibles of the electric utility industry from the very beginnings of the Age of Electricity to the aftermath of California's most recent energy crisis Selected from the best of the Bottom Lines columns carried in the nationally acclaimed California Energy Markets newsletter over the past decade The Guilty Environmentalist provides a unique and frequently hilarious perspective on a crucial industry that most people take for granted until the lights go out

The Skeptical Environmentalist Bjørn Lomborg, 2001 The Skeptical Environmentalist challenges widely held beliefs that the environmental situation is getting worse and worse The author himself a former member of Greenpeace is critical of the way in which many environmental organisations make selective and misleading use of the scientific evidence Using the best available statistical information from internationally recognised research institutes Bjørn Lomborg systematically examines a range of major environmental problems that feature prominently in headline news across the world His arguments are presented in non technical accessible language and are carefully backed up by over 2500 footnotes allowing readers to check sources for themselves Concluding that there are more reasons for optimism than pessimism Bjørn Lomborg stresses the need for clear headed prioritisation of resources to tackle real not imagined problems The Skeptical Environmentalist offers readers a non partisan stocktaking exercise that serves as a useful corrective to the more alarmist accounts favoured by campaign groups and the media

Ecologies of Guilt in Environmental Rhetorics Tim Jensen, 2019-10-28 Environmental rhetorics have expanded awareness of mass extinction climate change and pervasive pollution yet failed to generate collective action that adequately addresses such pressing matters This book contends that the anemic response to ecological upheaval is due in part to an inability to navigate novel forms of environmental guilt Combining affect theory with rhetorical analysis to examine a range of texts and media Ecologies of Guilt in Environmental Rhetorics positions guilt as a keystone emotion for contemporary environmental communication and explores how it is provoked perpetuated and framed through everyday discourse In revealing the need for emotional literacies that productively engage our complicity in global ecological harm the book looks to a future where guilt and its symbiotic relationships with anger shame and grief is shaped in tune with the ecologies that sustain us

The Environmentalist's Dilemma Arno Kopecky, 2021-10-19 For readers of Ronald Wright Rebecca Solnit and Yuval Noah Harari comes a compelling inquiry into our relationship with humanity's latest and greatest calamity In The Environmentalist's Dilemma award winning journalist Arno Kopecky zeroes in on the core predicament of our times the planet may be dying but humanity's doing better than ever To acknowledge both sides of this paradox is to enter a realm of difficult decisions Should we take down the government or try to change it from the inside Is it okay to compare climate change to Hitler Is hope naive or indispensable How do you

tackle collective delusion Should we still have kids And can we take them to Disneyland Inquisitive and relatable Kopecky strikes a rare note of optimistic realism as he guides us through the moral minefields of our polarized world From start to finish The Environmentalist s Dilemma returns to the central question How should we engage with the story of our times

their collective action The more unique the case the more we need to study it not only to understand the case itself but also to understand the structure and limits of environmentalism in general We hope that we have been able to show the value of this research strategy The way we have organized our study is different from the Rootes study 2003 This study emphasizes the importance of different environmental cultures and of political conjunctures in a single country of which different environmental groups take advantage We are not arguing against the fact that branches of environmentalism have features in common across countries e g animal rights and antinuclear movements However we would not go as far as the Rootes study We argue that looking at political conjunctures even if important does not tell the whole story Researchers need to understand the broader context in which political conjunctures and environmental culture operate A Diplomat in Environmentalist's Clothing Raymond M.
