The Hidden Dimension Psychodynamics In Compulsive Drug Use:

The Hidden Dimension Leon Wurmser, 1978 **The Hidden Dimension** Leon Wurmser, 1995 *Psychodynamics of Drug Dependence* National Institute on Drug Abuse. Division of Research, 1977 , *Psychodynamic Concepts in General Psychiatry* Harvey J. Schwartz, Efrain Bleiberg, Sidney H. Weissman, 1995 *Psychodynamic Concepts in General Psychiatry* brings together 37 nationally recognized psychodynamic psychiatrists who discuss in detail their understanding of how to work with specific types of patients. Separate chapters on clinical syndromes including some of the most challenging that psychiatrists encounter for example in self destructive posttraumatic and abused patients provide both a historical review of dynamic perspectives and a detailed discussion of differential diagnosis and treatment selection for each disorder. Extensive clinical examples illustrating the underlying psychodynamic conflicts of patients with these disorders are presented as well. Also addressed in this volume are the psychological aspects of the settings in which therapy is practiced and the ways in which those settings affect both the psychiatrist and the patient. The final section contains chapters on current topics of particular relevance: the psychology of prescribing and taking medication, the meaning and impact of interruptions in treatment and the provocative findings of new outcome research and cost offset studies. The book closes with a recommended curriculum for training in psychodynamic psychiatry.

Explorations in Criminal Psychopathology Louis B. Schlesinger, 2007. Emphasizing on psychopathology from a clinical phenomenological perspective with legal issues and implications, playing a secondary role, the contributors explore various disorders that have significant forensic implications. Each deals with a specific disorder or pathological process in terms of its potential relevance to criminal forensic practice.

Group Psychotherapy with Addicted Populations Philip J. Flores, 2007 *Group Psychotherapy with Addicted Populations An Integration of Twelve Step and Psychodynamic Theory Third Edition* is the newly revised edition of the classic text that brings together practical applications of 12 step programs and psychodynamic groups to provide proven strategies for defeating alcohol and drug addiction through group psychotherapy **What is Alcoholics Anonymous?** Marc Galanter, 2016 Alcoholics Anonymous has two million members worldwide yet this fellowship remains a mystery to most

people and is even viewed by some as a cult or a religion Written by an award winning psychiatrist and educator in the treatment of alcohol and drug abuse What Is Alcoholics Anonymous provides the most in depth overview to date of this popular and established yet poorly understood recovery movement The result is a thorough objective and accessible investigation into what AA is how it works and how the organization might be considered and used by both healthcare professionals and anyone affected by pursuit of recovery *The Globalization of Addiction* Bruce K. Alexander, 2008-07-03

The Globalization of Addiction presents a radical rethink about the nature of addiction Scientific medicine has failed when it comes to addiction There are no reliable methods to cure it prevent it or take the pain out of it There is no durable consensus on what addiction is what causes it or what should be done about it Meanwhile it continues to increase around the world This book argues that the cause of this failure to control addiction is that the conventional wisdom of the 19th and 20th centuries focused too single mindedly on the afflicted individual addict Although addiction obviously manifests itself in individual cases its prevalence differs dramatically between societies For example it can be quite rare in a society for centuries and then become common when a tribal culture is destroyed or a highly developed civilization collapses When addiction becomes commonplace in a society people become addicted not only to alcohol and drugs but to a thousand other destructive pursuits money power dysfunctional relationships or video games A social perspective on addiction does not deny individual differences in vulnerability to addiction but it removes them from the foreground of attention because social determinants are more powerful This book shows that the social circumstances that spread addiction in a conquered tribe or a falling civilisation are also built into today s globalizing free market society A free market society is magnificently productive but it subjects people to irresistible pressures towards individualism and competition tearing rich and poor alike from the close social and spiritual ties that normally constitute human life People adapt to their dislocation by finding the best substitutes for a sustaining social and spiritual life that they can and addiction serves this function all too well The book argues that the most effective response to a growing addiction problem is a social and political one rather than an individual one Such a solution would not put the doctors psychologists social workers policemen and priests out of work but it would incorporate their practices in a larger social project The project is to reshape society with enough force and imagination to enable people to find social integration and meaning in everyday life Then great numbers of them would not need to fill their inner void with addictions *The Self Psychology of Addiction and its Treatment* Richard B. Ulman, Harry Paul, 2013-04-03

In the time of Freud the typical psychoanalytic patient was afflicted with neurotic disorders however the modern day psychotherapy patient often suffers instead from a variety of addictive disorders As the treatment of neurotic disorders based on unconscious conflicts cannot be applied to treatment of addictive disorders psychoanalysis has been unable to keep pace with the changes in the type of patient seeking help To address the shift and respond to contemporary patients needs Ulman and Paul present a thorough discussion of addiction that studies and analyzes treatment options Their honest and unique work

provides new ideas that will help gain access to the fantasy worlds of addicted patients The Self Psychology of Addiction and Its Treatment emphasizes clinical approaches in the treatment of challenging narcissistic patients struggling with the five major forms of addiction Ulman and Paul focus on six specific case studies that are illustrative of the five forms of addiction They use the representative subjects to develop a self psychological model that helps to answer the pertinent questions regarding the origins and pathway of addiction This comprehensive book links addiction and trauma in an original manner that creates a greater understanding of addiction and its foundations than any clinical or theoretical model to date

Harm Reduction Psychotherapy Andrew Tatarsky, 2007-06-10 This ground breaking volume provides readers with both an overview of harm reduction therapy and a series of ten case studies treated by different therapists that vividly illustrate this treatment approach with a wide variety of clients Harm reduction is a framework for helping drug and alcohol users who cannot or will not stop completely_ the majority of users_ reduce the harmful consequences of use Harm reduction accepts that abstinence may be the best outcome for many but relaxes the emphasis on abstinence as the only acceptable goal and criterion of success Instead smaller incremental changes in the direction of reduced harmfulness of drug use are accepted This book will show how these simple changes in emphasis and expectation have dramatic implications for improving the effectiveness of psychotherapy in many ways From the Foreword by Alan Marlatt Ph D O This ground breaking volume provides readers with both an overview of harm reduction therapy and a series of ten case studies treated by different therapists that vividly illustrate this treatment approach with a wide variety of clients In his introduction Andrew Tatarsky describes harm reduction as a new paradigm for treating drug and alcohol problems Some would say that harm reduction embraces a paradigm shift in addiction treatment as it has moved the field beyond the traditional abstinence only focus typically associated with the disease model and the ideology of the twelve step approach Others may conclude that the move toward harm reduction represents an integration of what Dr Tatarsky describes as the O basic principles of good clinical practice O into the treatment of addictive behaviors O Changing addiction behavior is often a complex and complicated process for both client and therapist What seems to work best is the development of a strong therapeutic alliance the right fit

between the client and treatment provider The role of the harm reduction therapist is closer to that of a guide someone who can provide support and guidance throughout the difficult journey The therapist guide offers validation and respect for each client along with willingness to meet the person where he or she is on the journey and to help them achieve the next step toward their goal O Current Trends in Correctional Education Sol Chaneles,1983 Experts in the field of corrections and criminal justice examine topics of concern to all corrections professionals and educators in this insightful volume The theory and actual practice of correctional education is focused on such topics as the effects of self esteem counseling on male prisoners self concepts detention education communication disorders among inmates and many other areas **First Steps in the Clinical Practice of Psychotherapy** Maxa Ott,2001 TABLE OF CONTENTS Part 1 Preliminary Considerations Framework for Becoming a Therapist 1 How to conduct yourself 2 What a beginning therapist cannot do without Clinical supervision personal therapy continuing education 3 The therapeutic frame Setting and maintaining boundaries 4 First contact on the phone 5 Meeting the client 6 Initial consultation 7 The assessment process 8 Making a provisional diagnosis 9 Hierarchy of priorities in treatment 10 When and how to be directive Suicide tarasoff abuse situations 11 How to hospitalize a patient 12 Coordinating services with other professionals 13 Working with minors couples and families 14 Working with cour ordered clients 15 Theird party requests for information regarding your client 16 Scenerios of client therapist interactions 17 Paperwork Clinical notes and treatment summaries 18 Theoretical concepts 19 Margaret maahler s developmental model *The Globalization of Addiction* Bruce Alexander,2010-03-04 Addiction is increasing all around the world and the conventional remedies don t work The Globalization of Addiction argues that the cause of this failure to control addiction is that past treatments have focused too single mindedly on the afflicted individual addict This book presents a radical rethink about the nature of addiction *The Psychodynamics of Addiction* Martin Weegmann,Marcel Cohen,2008-09-15 In the treatment of addictions and their psychological understanding cognitive behavioural and motivation approaches have been paramount In contrast the psychodynamic contribution has been muted This book redresses this imbalance by bringing together a team of senior clinicians with psychotherapeutic backgrounds as well as extensive experience in addiction Stress is placed on the diversity of psychodynamic understanding and its relevance to the everyday problems met by addicted individuals The first theoretical part of the book is followed by examples from group and individual therapy and the foreword is written by Dr Edward Khantzian The Psychodynamics of Addiction will be of interest to psychotherapists who may lack experience in addiction and to other clinicians working in the field doctors nurses and psychologists Introduction Review of Different Schools Container and Contained The School of Bion The Application of Bowlby s Attachment Theory to the Psychotherapy of Addictions The Vulnerable Self Heinz Kohut and the Addictions Therapy Dynamics of Addiction in the Clinical Situation Psychodynamic Assessment of Drug Addicts Individual Psychotherapy with Addicted People Group Therapy for Addiction Helping the Helpers Psychodynamic Perspective on Relapse Prevention in
