Electronics for Kids Oyvind Nydal Dahl, 2016-07-15 Why do the lights in a house turn on when you flip a switch? How does a remote-controlled car move? And what makes lights on TVs and microwaves blink? The technology around you may seem like magic, but most of it wouldn't run without electricity. *Electronics for Kids* demystifies electricity with a collection of awesome hands-on projects. In Part 1, you'll learn how current, voltage, and circuits work by making a battery out of a lemon, turning a metal bolt into an electromagnet, and transforming a paper cup and some magnets into a spinning motor. In Part 2, you'll make even more cool stuff as you solder a blinking LED circuit with resistors, capacitors, and relays. Turn a circuit into a touch sensor using your finger as a resistor. Build an alarm clock triggered by the sunrise. Create a musical instrument that makes sci-fi sounds. Then in Part 3, you'll learn about digital electronics, things like logic gates and memory circuits, as you make a secret code checker and an electronic coin flipper. Finally, you'll use everything you've learned to make the LED Reaction Game, test your reaction time as you try to catch a blinking light. With its clear explanations and assortment of hands-on projects, *Electronics for Kids* will have you building your own circuits in no time.

Getting Started with Sensors Kimmo Karvinen, Tero Karvinen, 2014-08-14 To build electronic projects that can sense the physical world, you need to build circuits based around sensors—electronic components that react to physical phenomena by sending an electrical signal. Even with only basic electronic components, you can build useful and educational sensor projects. But if you incorporate Arduino or Raspberry Pi into your project, you can build much more sophisticated projects that can react in interesting ways and even connect to the Internet. This book starts by teaching you the basic electronic circuits to read and react to a sensor. It then goes on to show how to use Arduino to develop sensor systems and wraps up by teaching you how to build sensor projects with the Linux-powered Raspberry Pi.
