Textbook Of The History Of Architecture:

A Text-book of the History of Architecture Alfred Dwight Foster Hamlin, 1909 **A World History of Architecture** Marian Moffett, Michael W. Fazio, Lawrence Wodehouse, 2003

The Roman architect and engineer Vitruvius declared *firmitas* *utilitas* and *venustas* firmness commodity and delight to be the three essential attributes of architecture. These qualities are brilliantly explored in this book which uniquely comprises both a detailed survey of Western architecture including Pre-Columbian America and an introduction to architecture from the Middle East, India, Russia, China, and Japan. The text encourages readers to examine closely the pragmatic, innovative, and aesthetic attributes of buildings and to imagine how these would have been praised or criticized by contemporary observers. Artistic, economic, environmental, political, social, and technological contexts are discussed so as to determine the extent to which buildings met the needs of clients, society at large, and future generations.

A Text-book of the History of Architecture Alfred Dwight Foster Hamlin, 1947 *A Text-Book of the History of Architecture* A. D. F. Hamlin, 2015-06-04

Excerpt from *A Text Book of the History of Architecture*. The aim of this work has been to sketch the various periods and styles of architecture with the broadest possible strokes and to mention with such brief characterization as seemed permissible or necessary the most important works of each period or style. Extreme condensation in presenting the leading facts of architectural history has been necessary and much that would rightly claim place in a larger work has been omitted here. The danger was felt to be rather in the direction of too much detail than of too little. While the book is intended primarily to meet the special requirements of the college student, those of the general reader have not been lost sight of. The majority of the technical terms used are defined or explained in the context and the small remainder in a glossary at the end of the work. Extended criticism and minute description were out of the question and discussion of controverted points has been in consequence as far as possible avoided. The illustrations have been carefully prepared with a view to elucidating the text rather than for pictorial effect. With the exception of some fifteen cuts reproduced from Lübke's *Geschichte der Architektur* by kind permission of Messrs Seemann of Leipzig, the illustrations are almost all entirely new. About the Publisher: Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com. This book is a reproduction of an important historical work.
