The Canadian Encyclopedia James H. Marsh, 1999 This edition of The Canadian Encyclopedia is the largest most comprehensive book ever published in Canada for the general reader It is COMPLETE every aspect of Canada from its rock formations to its rock bands is represented here It is UNABRIDGED all of the information in the four red volumes of the famous 1988 edition is contained here in this single volume It has been EXPANDED since 1988 teams of researchers have been diligently fleshing out old entries and recording new ones as a result the text from 1988 has grown by 50% to over 4 000 000 words It has been UPDATED the researchers and contributors worked hard to make the information as current as possible Other words apply to this extraordinary work of scholarship AUTHORITATIVE RELIABLE and READABLE Every entry is compiled by an expert Equally important every entry is written for a Canadian reader from the Canadian point of view The finished work many years in the making and the equivalent of forty average sized books is an extraordinary storehouse of information about our country This book deserves pride of place on the bookshelf in every Canadian Home It is no accident that the cover of this book is based on the Canadian flag For the proud truth is that this volume represents a great national achievement From its formal inception in 1979 this encyclopedia has always represented a vote of faith in Canada in Canada as a separate place whose natural worlds and whose peoples and their achievements deserve to be recorded and celebrated At the start of a new century and a new millennium in an increasingly borderless corporate world that seems ever more hostile to national distinctions and aspirations this Canadian Encyclopedia is offered in a spirit of defiance and of faith in our future The statistics behind this volume are staggering The opening sixty pages list the 250 Consultants the roughly 4 000 Contributors all experts in the field they describe and the scores of researchers editors typesetters proofreaders and others who contributed their skills to this massive project The 2 640 pages incorporate over 10 000 articles and over 4 000 000 words making it the largest some might say the greatest Canadian book ever published There are of course many special features These include a map of Canada a special page comparing the key statistics of the 23 major Canadian cities maps of our cities a variety of tables and photographs and finely detailed illustrations of our wildlife not to mention the colourful informative endpapers But above all

the book is encyclopedic which the Canadian Oxford Dictionary describes as embracing all branches of learning This means that with rare exceptions there is satisfaction for the reader who seeks information on any Canadian subject From the first entry A mari usque ad mare from sea to sea which is Canada's motto and a good description of this volume's range to the Zouaves who mustered in Quebec to fight for the beleaguered Papacy there is the required summary of information clearly and accurately presented For the browser the constant variety of entries and the lure of regular cross references will provide hours of fascination The word encyclopedia derives from Greek expressions alluding to a grand circle of knowledge Our knowledge has expanded immeasurably since the time that one mind could encompass all that was known Yet now Canada's finest scientists academics and specialists have distilled their knowledge of our country between the covers of one volume The result is a book for every Canadian who values learning and values Canada

Variation in women's attitudes toward intimate partner violence across the rural-urban continuum in Ethiopia Amare, Mulubrhan, Arndt, Channing, Guo, Zhe, Seymour, Gregory, 2020-12-31 Little is known about the impacts of urbanization on women's attitudes toward intimate partner violence IPV The scarcity of empirical studies on this relationship can be partly attributed to the lack of an objective measure of urbanization levels In this study we investigate the effects of urbanization on both women's attitudes toward IPV using three continuous measures of urbanization nighttime light intensity distance to urban areas and total urban area within a 10 km radius These measures are defined from satellite based nighttime light intensity and multispectral sensor data We find that despite a generally strong positive association between urbanization and progressive attitudes among women toward IPV some stages

of urbanization show a more significant association than others. Such nonlinear relationships are apparent in all estimations and across different measurements of urbanization. The heterogeneities in the effect of urbanization on women's attitudes toward intimate partner violence further show that the effects of urbanization are sharply heterogeneous across wealth indicator terciles. While we find that urbanization is associated with an overall decrease in the acceptance of IPV, the effect is mostly concentrated in higher wealth terciles. For women in lower wealth terciles, urbanization is either insignificant or even associated with an increase in the acceptance of IPV.

The Wacousta Syndrome Gaile McGregor, 1985 Canadian Literature, 1979

Marine Ecosystems Tasman P. Crowe, Christopher L. J. Frid, 2015-06-18. Ecosystem services are emerging as a key driver of conservation policy and environmental management. Delivery of ecosystem services depends on the efficient functioning of ecosystems, which in turn depends on biodiversity and environmental conditions. Many marine ecosystems are extremely productive and highly valued but they are increasingly threatened by human activities. With contributions from leading researchers, this volume synthesises current understanding of the effects on biodiversity and ecosystem functioning caused by a variety of human activities and pressures at play in coastal marine ecosystems. The authors examine the likely consequences for ecosystem service provision, covering key topics including fisheries, aquaculture, physical structures, nutrients, chemical contaminants, marine debris, and invasive species. Critically reviewing the latest developments, this is a unique resource both for environmental managers and policy makers and for researchers and students in marine ecology and environmental management.
