The Harvey Lectures R. L. Brinster, J. A. Steitz, H. Metzger, R. L. R. White, P. Cuatrecasas, R. A. Weinberg, N. M. Le Douarin, 1986-05-07 The Harvey Lecture Series is published annually and provides definitive up to date reviews of recent research topics in the biomedical sciences This volume comprises seven lectures by eminent investigators representing the most recent work in the major laboratories The lectures cover introduction of genes into the germ line of animals autoantibody probes for mammalian gene expression antibodies as effector molecules mapping human chromosomes hormone receptors membrane phospholipids and protein kinases oncogenes and the molecular basis of cancer and ontogeny of the peripheral nervous system from the neural crest and the placodes a developmental model studied on the basis of the quail chick chimaera system **National Library of Medicine News** National Library of Medicine (U.S.), 1986 Books in Series, 1876-1949 R.R. Levitan, 1987 Traditional neuroscience texts have stressed the output of neurons how they turn postsynaptic targets on or off cause muscles to twitch or convert photons into electrical pulses Neuromodulation alters that emphasis to examine how the responses of nerve cells can be modified Because a neuron's performance can be modulated brains of all animals exhibit the amazing capacity to learn Presenting the best studied examples Kaczmarek and Levitan provide the first detailed review of those potassium and calcium channels whose functions are modulated through receptor mediated second messenger mechanisms and that are thought to underlie many important kinds of neuronal plasticity This book which covers up to date biophysical work in both vertebrate and invertebrate neurons will be greatly appreciated by the readership the authors wish to reach neurophysiological biochemists and biochemical neurophysiologists interested in understanding how behavior results from the action of nerve cells James H Schwartz M D Ph D Columbia University College of Physicians and Surgeons **Cancer Biochemistry Biophysics** Harry Darrow Brown, 1986 *Journal of the Royal Society of Medicine* Royal Society of Medicine (Great Britain), 1987 Includes selected papers from meetings of the Society and of its sections *The Biology of Wool and Hair* G. A. Pullman,Joshua Jortner,2012-12-06 The 25th Jerusalem Symposium represents a most significant highlight in the development and history of these meetings Living within the decimal system we have celebrated with much pleasure the lath and the 20th Jerusalem Symposia With this one we experience a feeling of particular satisfaction because 25 years is different from is more than two decades and a half It is a quarter of a century It seems thus as if we have changed the dimension of our endeavour In no way do we loose the sense of modesty with respect to the significance of these meetings For the organizers however they do represent a continuity of efforts which we feel happy to have been able to carry out At this occasion it seems useful to say a few words about the origin of the Jerusalem Symposia and to recall the name of a colleague who played an essential role in their creation and has been a most efficient and devoted co organizer of the seven first of them This was Professor Ernst Bergmann one of the most distinguished founders of Israeli Science and a world famous physico organic chemist **Reflex Control of the Circulation** Irving H. Zucker,Joseph P. Gilmore,2020-02-03

Reflex Control of the Circulation presents an interdisciplinary discussion of concepts in the reflex control of circulation This volume describes aspects of autonomic receptor physiology central pathways of reflex control the electrophysiology of cardiovascular afferents the interaction between reflexes the autonomic control of regional blood flows the autonomic control of fluid and electrolyte balance and neurohumoral control of the circulation through normal and pathological states e g hypertension congestive heart failure In addition the regulation of regional blood flow during exercise and developmental aspects of reflex control are examined Any researcher interested in the autonomic system and its role in circulation will find this book fascinating reading Biomechanisms Regulating Growth and Development George L. Steffens,Theron S.

Rumsey,2012-12-06 The Annual Beltsville Symposium provides a forum for interaction among scientists involved in research that is vitally important to agri culture and to the agricultural sciences The Twelfth Symposium in this series focused on the unifying biochemical and physiological mechan isms controlling growth and development of biological systems ani mals plants insects Unraveling the complex biochemical mechanisms associated with the sequencing of organism growth and development and identifying locating and manipulating key control mechanisms are essential in utilizing the full potential of biotechnology for improving the composition and quality of agricultural products and the profitability of agriculture Accordingly speakers directed their remarks to basic aspects of biological mechanisms in their area of specialization with

consideration given to current status future direction potential impact and limitations to progress The Symposium addressed fundamental questions in Tissue specific gene regulation cell division and differentiation Mechanisms for regulating hormone concentration Hormonal regulation of growth and development Non hormonal regulation of growth and development Nutritional regulation of growth and development Because the backgrounds of the symposium attendees covered a wide spectrum in the basic biological and physical sciences each topic was introduced by a brief overview but general reviews were avoided in favor of findings from on going research projects The symposium brought together a distinguished group of invited scientists from around the world who are leaders Many attendees made poster presentations which increased the exchange of ideas and stimulated informal discussion

Idiotypes Morris Reichlin, 2012-12-02 Idiotypes documents the proceedings of an International Conference on Idiotypes held in Oklahoma City Oklahoma at the Oklahoma Medical Research Foundation October 20-23 1985 The aims of the conference were to gather active investigators in the study of idiotypes to assess progress in the field and to explore directions for future research The papers presented at the conference cover a wide range of subjects Several papers deal with defining protein and DNA sequences which determine idiotypes Evidence points to germ line genes encoding the V region structures which underlie idiotype Another subtheme which concerns several contributions is the occurrence of dominant idiotypes in induced immune responses e.g. arsonate and lysozyme and autoimmunity e.g. thyroglobulin and rheumatoid factors The presence of such dominant idiotypes is discussed from several viewpoints but the recurrent theme is that such dominance is a manifestation of a selection process inherent in the idiotype network Two papers deal with idiotype structures in T cells on the one hand identifying idiotypes on T helper cells and on the other I J and Iat related structures which tightly govern cellular interactions in the evolution of an immune response Network interactions through autoanti idiotype responses are shown to be associated with the effects on the specificity of both induced and naturally occurring immune responses Autoanti idiotype responses are also shown to be correlated with the regulation of the anti DNA response in human systemic lupus erythematosus These data pointed to a role of the idiotype network in immune regulation

Genes And Genomes Maxine Singer, Paul Berg, 1991 The celebrated authors present an in depth overview of the molecular structures and mechanisms that underlie the utilization of genetic information by complex organisms They emphasize the experimental aspects of molecular genetics offering a complete introduction to both principles and methods Excellent suitably detailed and superbly written Philip Leder Harvard Medical School

Bone Marrow Transplantation Richard Champlin M.D., 2012-12-06 Bone marrow transplantation has emerged as a major form of treatment for a broad range of human diseases Marrow transplantation has many unique biologic features and its principles differ markedly from the transplantation of solid organs This volume overviews the present status of bone marrow transplantation and summarizes recent progress and controversies Advances in defining the underlying biology of marrow transplantation are discussed The current status of several major clinical problem areas are reviewed including engraftment

acute and chronic graft versus host disease immunodeficiency and opportunistic infections The therapeutic role of allogeneic and autologous bone marrow transplantation is discussed and results are compared with alternative therapies IX List of contributors ANASETII CLAUDIO M D Fred Hutchinson Cancer Research Center 1124 Columbia Street Seattle Washington 98104 APPELBAUM FRED M D Fred Hutchinson Cancer Research Center 1124 Columbia Street Seattle Washington 98104 ARMITAGE JAMES O M D Department of Internal Medicine University of Nebraska Medical Center 42nd and Dewey Avenue Omaha Nebraska 68105 BEATTY PATRICK G M D Fred Hutchinson Cancer Research Center 1124 Columbia Street Seattle Washington 98104 BIERMAN PHILIP J M D Department of Internal Medicine University of Nebraska Medical Center 42nd and Dewey Avenue Omaha Nebraska 68105 BUTTURINI ANNA M D Department of Pediatrics University of Parma School of Medicine Parma Italy CHAMPLIN RICHARD M D Latina Issues Antoinette Sedillo López, 2020-08-11 This book attempts to make Latina history visible and Latina voices heard It focuses solely on women not to marginalize Latina stories but to showcase them illustrating Latina perspectives on colonization gender race and class
