consultancy practice and a wide range of current research Cognitive-behavioral Therapy for Deaf and Hearing Persons with Language and Learning Challenges Neil S. Glickman, 2009 The needs of deaf and hearing people with limited functioning can be a challenge for the mental health practitioner to meet This text provides concrete guidance for adapting best practices in cognitive behavioral therapy to deaf and hearing persons who are non or semi literate and who have greatly impaired language skills or other cognitive deficits such as mental retardation that make it difficult for them to benefit from traditional talk and insight oriented psychotherapies **Career Opportunities in Casinos and Casino Hotels** Shelly Field, 2009 Features numerous job profiles in the casino and gaming industry and includes appendixes covering professional organizations schools associations unions and casinos Career profiles include blackjack dealer casino host concierge and hotel publicist **Adapting to climate change** Great Britain: Parliament: House of Commons: Environmental Audit Committee, 2010-03-25 Climate projections show that Britain can expect wetter winters drier summers and a higher likelihood of flash floods heat waves and droughts Yet adaptation to climate change has been given only a fraction of the attention that has gone into reducing greenhouse gases The Government must build awareness and support for the wide ranging and urgent programme of action that is needed to protect people property and prosperity and safeguard the natural environment Adapting infrastructure and homes will be expensive To maintain current levels of flood protection for homes real terms spending on flood defences will need to increase from its current level of around 600 million per annum to around 1 billion in 2035 Estimates in 2009 suggest that by the end of the century around 7 billion may be needed to improve the Thames flood barrier and tidal defences New homes being built now must be designed to cope with the inevitable changes in climate over the next 50 80 years The Government must make adaptation and mitigation more central to the planning system New developments should only be permitted if they are suited to future climates Existing homes will also need to be adapted so that they are comfortable during hotter summers and better protected against the risk of flooding The Government must help to kick start an integrated retro fitting programme that covers adaptation water efficiency and energy efficiency Green infrastructure such as water storage greater tree cover and more open green spaces must also be promoted Using Social Marketing for Public Emergency Preparedness Nancy Meyer-Emerick, 2015-08-11 Less than half of the public in the U S have taken the three steps to prepare for emergencies that are recommended by FEMA and the Red Cross having a 3 day emergency kit a family communication plan and knowing where to get information during an emergency Although emergency managers attempt to train the public often they are only able to distribute brochures and make public notifications For a variety of reasons the public frequently ignores this guidance leaving people more vulnerable during emergencies This book applies the process of social marketing which has been used widely in public health and other disciplines to the lack of public preparedness Written for emergency managers in government and non profit agencies students and volunteers the book provides enough background and resources to enable the user to carry out an effective emergency preparedness campaign in

their community and maintain it over time Unlike preparing one message for everyone social marketing involves working with smaller communities to identify what and how people want to learn training them and then maintaining that relationship to insure their preparedness Because most emergency management agencies lack resources to take on such an initiative the book provides readers with low cost methods to begin a social marketing program **Traditional and Innovative**
