Cognitive Archaeology David Whitley, Johannes Loubser, Gavin Whitelaw, 2019-11-28 Cognitive Archaeology Mind Ethnography and the Past in South Africa and Beyond aims to interpret the social and cultural lives of the past in part by using ethnography to build informed models of past cultural and social systems and partly by using natural models to understand symbolism and belief How does an archaeologist interpret the past Which theories are relevant what kinds of data must be acquired and how can interpretations be derived One interpretive approach developed in southern Africa in the 1980s has been particularly successful even if still not widely known globally With an expressed commitment to scientific method it has resulted in deeper well tested understandings of belief ritual settlement patterns and social systems This volume brings together a series of papers that demonstrate and illustrate this approach to archaeological interpretation including contributions from North America Western Europe and sub Saharan Africa in the process highlighting innovative methodological and substantive research that improves our understanding of the human past Professional archaeological researchers would be the primary audience of this book Because of its theoretical and methodological emphasis it will also be relevant to method and theory courses and postgraduate students
