Self-Control in Animals and People Michael Beran, 2018-08-11. Self-Control in Animals and People takes an interdisciplinary look at what self-control is, how it works, and whether humans are alone as a species in their ability to demonstrate self-control. The book outlines historical and recent empirical approaches to understanding when self-control succeeds and fails, and which species may share with humans the ability to anticipate better future outcomes. It also provides readers with in-depth explorations of whether various species can delay gratification, the ways in which people and animals exhibit other forms of self-control, what influences the capacity and expression of self-control, and much more. In addition to its comprehensive coverage of self-control research, the book also describes self-control assessment tests that can be used with young children, adults, and a wide variety of nonhuman species, with the goal of

making fair and clear comparisons among the groups This combination makes *Self Control in Animals and People* a valuable resource for cognitive developmental and clinical psychologists philosophers academic students and researchers in psychology and the social sciences and animal behaviorists Provides a comprehensive perspective of the evolutionary emergence of self control across species Explores different kinds of self control and their links to one another and whether self control can be improved or strengthened Offers insight on mental time travel chronesthesia and how it relates to self control Demonstrates how to develop self control tests for human and nonhuman animals and how to make fair and clear comparisons among those groups Another Encyclopedia of Theme Activities for Young Children Stephanie Roselli, Kathy Charner, Brittany Roberts, 2012 Provides over three hundred activities for young children both in and out of the classroom organized thematically and includes such themes as building and construction health and nutrition and science and nature
