## Smart Office:

**Smart Environments** Diane Cook, Sajal Kumar Das, 2004-10-28 Smart Environments contains contributions from leading researchers describing techniques and issues related to developing and living in intelligent environments Reflecting the multidisciplinary nature of the design of smart environments the topics covered include the latest research in smart environment philosophical and computational architecture considerations network protocols for smart environments intelligent sensor networks and powerline control of devices and action prediction and identification *Sales Management* Thomas N. Ingram, Raymond W. LaForge, Ramon A. Avila, Charles H. Schwepker Jr., Michael R. Williams, 2015-03-27 The new 9th edition of Sales Management continues the tradition of blending the most recent sales management research with real life best practices of leading sales organizations The authors teach sales management courses and interact with sales managers and sales management professors on a regular basis Their text focuses on the importance of employing different sales strategies for different consumer groups as well as integrating corporate business marketing and sales strategies Sales Management includes current coverage of the trends and issues in sales management along with numerous real world examples from the contemporary business world that are used throughout the text to illuminate chapter discussions Key changes in this edition include Updates in each chapter to reflect the latest sales management research and leading sales management trends and practices An expanded discussion on trust building and trust based selling as foundations for effective sales management All new chapter opening vignettes about well known companies that introduce each chapter and illustrate key topics from that chapter New or updated comments from sales managers in Sales Management in the 21st Century boxes An online instructor s manual with test questions and PowerPoints is available to adopters *Smart City and Informatization* Guojun Wang, Abdulmotaleb El Saddik, Xuejia Lai, Gregorio Martinez Perez, Kim-Kwang Raymond Choo, 2019-11-05 This book constitutes the refereed proceedings of the 7th International Conference on Smart City and Informatization iSCI 2019 held in Guangzhou China in November 2019 The volume presents 52 full papers which were carefully reviewed and selected from 139 submissions The papers are organized in topical sections on Internet of Things IoT and smart sensing urban computing and big data smart society informatization technologies cloud edge fog computing for smart city applications for smart city informatization assistive engineering and information technology cyberspace security blockchain and applications **Managing Learning Organization in Industry 4.0** Indira Rachmawati, Ratih Hendayani, 2020-06-02 The proceedings of the 6th International Seminar Conference on Learning Organization ISCLO with the theme Enhancing Organization s Competitiveness through Knowledge Sharing and Learning Culture in the 4 0 Era provides research results from scientists scholars and practitioners exchanging information and discussing the latest issues related to topics such as Marketing Human Resources Industrial Behavior and Knowledge Management Entrepreneurship and Strategic Management IT and Operations Management Economics Financial and Accounting These papers will

contribute to the enhancement of the organization's competitive advantage with technology serving as a supporting system for knowledge sharing and learning culture. These proceedings will be of interest to scholars, practitioners, government, and the industry employees taking part in increasing Global Competitiveness in the coming years. Reliability Engineering and Computational Intelligence for Complex Systems Coen van Gulijk, Elena Zaitseva, Miroslav Kvassay, 2023-09-23. This book offers insight into the current issues of the merger between reliability engineering and computational intelligence. The intense development of information technology allows for designing more complex systems as well as creating more detailed models of real world systems which forces traditional reliability engineering approaches based on Boolean algebra, probability theory and statistics to embrace the world of data science. The works deal with methodological developments as well as applications in the development of safe and reliable systems in various kinds of distribution networks in the development of highly reliable healthcare systems in finding weaknesses in systems with the human factor or in reliability analysis of large information systems and other software solutions. In this book, experts from various fields of reliability engineering and computational intelligence present their view on the risks, the opportunities and the synergy between reliability engineering and computational intelligence that have been developed separately but in recent years have found a way to each other. The topics addressed include the latest advances in computing technology to improve the real lives of millions of people by increasing safety and reliability of various types of real life systems by increasing the availability of software services, reducing the accident rate of means of transport, developing high reliable patient specific health care or generally save cost and increase efficiency in the work and living environment. Though this book, the reader has access to professionals and researchers in the fields of reliability engineering and computational intelligence that share their experience in merging the two as well as an insight into the latest methods, concerns and application domains. **Software Security -- Theories and Systems** Mitsuhiro Okada, 2003-02-21. For more than the last three decades, the security of software systems has been an important area of computer science, yet it is a rather recent general recognition that technologies for software security are highly needed. This book assesses the state of the art in software and systems security by presenting a carefully arranged selection of revised, invited and reviewed papers. It covers basic aspects and recently developed topics such as security of pervasive computing, peer to peer systems and autonomous distributed agents, secure software circulation, compilers for fail safe C language, construction of secure mail systems, type systems and multiset rewriting systems for security protocols and privacy issues as well. Pervasive Computing Minyi Guo, Jingyu Zhou, Feilong Tang, Yao Shen, 2016-08-05. This book introduces fundamental concepts and theories in pervasive computing as well as its key technologies and applications. It explains how to design and implement pervasive middleware and real application systems covering nearly all aspects related to pervasive computing. Key technologies in the book include pervasive computing oriented resource management and task migration, mobile pervasive transaction, human computer interface and context

collection oriented wireless sensor networks      **Computer Networks and Inventive Communication Technologies** S. Smys, Ram Palanisamy, Álvaro Rocha, Grigorios N. Beligiannis, 2021-06-02 This book is a collection of peer reviewed best selected research papers presented at 3rd International Conference on Computer Networks and Inventive Communication Technologies ICCNCT 2020 The book covers new results in theory methodology and applications of computer networks and data communications It includes original papers on computer networks network protocols and wireless networks data communication technologies and network security The proceedings of this conference is a valuable resource dealing with both the important core and the specialized issues in the areas of next generation wireless network design control and management as well as in the areas of protection assurance and trust in information security practice It is a reference for researchers instructors students scientists engineers managers and industry practitioners for advance work in the area

**Your iPad 2 at Work** Jason R. Rich, 2012 Provides information on the features of the iPad 2 with step by step instructions covering such topics as connecting to a wi fi and 3G network downloading apps creating documents and spreadsheets building and displaying presentations using email and watching movies      **Proceedings of the International Conference on Artificial Intelligence and Computer Vision (AICV2021)** Aboul Ella Hassanien, Abdelkrim Haqiq, Peter J. Tonellato, Ladjel Bellatreche, Sam Goundar, Ahmad Taher Azar, Essaid Sabir, Driss Bouzidi, 2021-05-28 This book presents the 2nd International Conference on Artificial Intelligence and Computer Visions AICV 2021 proceeding which took place in Settat Morocco from June 28 to 30 2021 AICV 2021 is organized by the Scientific Research Group in Egypt SRGE and the Computer Networks Mobility and Modeling Laboratory IR2M Hassan 1st University Faculty of Sciences Techniques Settat Morocco This international conference highlighted essential research and developments in the fields of artificial intelligence and computer visions The book is divided into sections covering the following topics Deep Learning and Applications Smart Grid Internet of Things and Mobil Applications Machine Learning and Metaheuristics Optimization Business Intelligence and Applications Machine Vision Robotics and Speech Recognition Advanced Machine Learning Technologies Big Data Digital Transformation AI and Network Analysis Cybersecurity Feature Selection Classification and Applications      Innovation of Higher Education: Change-Makers at Incheon National University 1 Cho Dong-sung et al., 2020-07-31 Incheon National University INU blazes the trail of innovation INU spearheads change in academia in Korea and abroad This book outlines case studies of innovation at INU which developed a new paradigm of innovation driven by field staff The text itself is the product of hands on fieldwork carried out by 275 members of the INU staff These staff members demonstrate how the driving force for innovation rises from the change makers themselves The book shares INU s tried and tested lessons on problem solving implementing innovation surveying public opinion and gathering feedback from the field all of which allow other change seeking universities and institutions to benchmark their innovative programs      **Workshop Proceedings of the 11th International Conference on Intelligent Environments** D. Preuveneers, 2015-07-06 With emerging trends such

as the Internet of Things sensors and actuators are now deployed and connected everywhere to gather information and solve problems and such systems are expected to be trustworthy dependable and reliable under all circumstances But developing intelligent environments which have a degree of common sense is proving to be exceedingly complicated and we are probably still more than a decade away from sophisticated networked systems which exhibit human like thought and intelligent behavior This book presents the proceedings of four workshops and symposia the 4th International Workshop on Smart Offices and Other Workplaces SOOW 15 the 4th International Workshop on the Reliability of Intelligent Environments WoRIE 15 the Symposium on Future Intelligent Educational Environments and Learning 2015 SOFIEEe 15 and the 1st immersive Learning Research Network Conference iLRN 15 These formed part of the 11th International Conference on Intelligent Environments held in Prague Czech Republic in July 2015 which focused on the development of advanced reliable intelligent environments as well as newly emerging and rapidly evolving topics This overview of and insight into the latest developments of active researchers in the field will be of interest to all those who follow developments in the world of intelligent environments

**Eco-Friendly Workspaces: Designing Offices for Sustainability** Ahmed Musa,2025-01-06 Transform the modern office into a hub of sustainability with Eco Friendly Workspaces This book explores innovative ways to design work environments that reduce waste conserve energy and promote well being From choosing sustainable materials to incorporating natural elements you ll discover how to create eco conscious spaces without compromising functionality Packed with case studies actionable tips and forward thinking solutions Eco Friendly Workspaces is perfect for business owners designers and professionals committed to a greener future Make sustainability a core part of your workplace and inspire a more responsible way to work

**Distributed, Ambient, and Pervasive Interactions** Norbert Streitz,Panos Markopoulos,2015-07-21 This book constitutes the refereed proceedings of the Third International Conference on Distributed Ambient and Pervasive Interactions DAPI 2015 held as part of the 17th International Conference on Human Computer Interaction HCII 2015 held in Los Angeles CA USA in August 2015 jointly with 15 other thematically conferences The total of 1462 papers and 246 posters presented at the HCII 2015 conferences were carefully reviewed and selected from 4843 submissions These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems The papers accepted for presentation thoroughly cover the entire field of human computer interaction addressing major advances in knowledge and effective use of computers in a variety of application areas This volume contains papers addressing the following major topics designing and developing intelligent environments natural interaction design and development of distributed ambient and pervasive interactions smart devices objects and materials location motion and activity recognition smart cities and communities and humor in ambient intelligence

**Mobile Intelligence** Laurence T. Yang,2010-02-12 Focuses on learning patterns and knowledge from data generated by mobile users and mobile technology Covers research and application issues in applying computational intelligence applications to

mobile computing Delivers benefits to a wide range of applications Introduces the state of the art of computational intelligence to the mobile paradigm **Green Engineering and Technology** Om Prakash Jena,Alok Ranjan Tripathy,Zdzislaw Polkowski,2021-06-15 Escalating urbanization and energy consumption have increased the demand for green engineering solutions and intelligent systems to mitigate environmental hazards and offer a more sustainable future Green engineering technologies help to create sustainable eco friendly designs and solutions with the aid of updated tools methods designs and innovations These technologies play a significant role in optimizing sustainability in various areas of energy agriculture waste management and bioremediation and include green computing and artificial intelligence AI applications Green Engineering and Technology Innovations Design and Architectural Implementation examines the most recent advancements in green technology across multiple industries and outlines the opportunities of emerging and future innovations as well as practical real world implementation Features Provides different models capable of fulfilling the criteria of energy efficiency health and safety renewable resources and more Examines recycling waste management and bioremediation techniques as well as waste to energy technologies Presents business cases for adopting green technologies including electronics manufacturing and infrastructure projects Reviews green technologies for applications such as energy production building construction transportation and industrialization Green Engineering and Technology Innovations Design and Architectural Implementation serves as a useful and practical guide for practicing engineers researchers and students alike **Advances in Internet, Data & Web Technologies** Leonard Barolli,Fatos Xhafa,Nadeem Javaid,Evjola Spaho,Vladi Kolici,2018-02-23 This book presents original contributions on the theories and practices of emerging Internet data and Web technologies and their applicability in businesses engineering and academia focusing on advances in the life cycle exploitation of data generated from the digital ecosystem data technologies that create value e g for businesses toward a collective intelligence approach The Internet has become the most proliferative platform for emerging large scale computing paradigms Among these data and web technologies are two of the most prominent paradigms and are found in a variety of forms such as data centers cloud computing mobile cloud and mobile Web services These technologies together create a digital ecosystem whose cornerstone is the data cycle from capturing to processing analyzing and visualizing The investigation of various research and development issues in this digital ecosystem are made more pressing by the ever increasing requirements of real world applications that are based on storing and processing large amounts of data The book is a valuable resource for researchers software developers practitioners and students interested in the field of data and web technologies **Issues in Multi-Agent Systems** Antonio Moreno,Juan Pavón,2007-12-22 Discover the latest developments and issues in multi agent systems by exploring their applications in various domains such as electronic markets e tourism ambience intelligence and complex system analysis The book is written by two researchers with hands on experience in technology transfer With their practical focus they help you see how agent technology can be applied in many new services and environments **9th EAI**

**International Conference on Management of Manufacturing Systems** Lucia Knapcikova, Dragan Perakovic, 2025-03-29  
The book presents the proceedings of the 9th EAI International Conference on Management of Manufacturing Systems MMS 2024 which took place October 9-11 2024 in Dubrovnik Croatia. The conference covers the management of manufacturing systems with support for Industry 4.0 logistics and intelligent manufacturing systems and applications cooperation management and its effective applications. Topics include RFID applications economic impacts in logistics ICT support for Industry 4.0 industrial and smart logistics intelligent manufacturing systems and applications and much more. The topic is of interest to researchers practitioners students and academics in manufacturing and communications engineering.

Intelligent Environments 2016 P. Novais, S. Konomi, 2016-10-12. The term Intelligent Environments (IEs) refers to physical spaces in which IT and other pervasive computing technologies are combined and used to achieve specific goals for the user, the environment or both. The ultimate objective of IE is to enrich user experience improve management of the environment in question and increase user awareness. This book presents the proceedings of the following workshops which formed part of the 12th International Conference on Intelligent Environments IE16 held in London UK in September 2016: the 5th International Workshop on Smart Offices and Other Workplaces SOOW 16 the 5th International Workshop on the Reliability of Intelligent Environments WoRIE 16 the 1st International Workshop on Legal Issues in Intelligent Environments LIIE 2016 the 2nd International Symposium on Future Intelligent Educational Environments and Learning SOFIEE 16 the 2nd International Workshop on Future Internet and Smart Networks FI the International Workshop on Intelligent Environments Supporting Healthcare and Well being WISHWell 2016 the International Workshop on Computation Sustainability Technologies and Applications CoSTA 2016 the Creative Science 2016 CS 16 and Cloud of Things 2016 CoT 16 the Workshop on Wireless Body Area Networks for Personal Monitoring in Intelligent Environments WBAN PMIE and the Physical Computing Workshop. The workshops focused on the development of advanced intelligent environments as well as newly emerging and rapidly evolving topics emphasizing the multi disciplinary and transversal aspects of IEs as well as cutting edge topics. The book will be of interest to all those whose work involves them in the use of intelligent environments.
