Do Smart Adaptive Systems Exist? Bogdan Gabrys, Kauko Leiviskä, Jens Strackeljan, 2006-07-11 Do Smart Adaptive Systems Exist is intended as a reference and a guide summarising and focusing on best practices when using intelligent techniques and building systems requiring a degree of adaptation and intelligence It is therefore not intended as a

collection of the most recent research results but as a practical guide for experts from other areas and industrial users interested in building solutions to their problems using intelligent techniques One of the main issues covered is an attempt to answer the question of how to select and or combine suitable intelligent techniques from a large pool of potential solutions Another attractive feature of the book is that it brings together experts from neural network fuzzy machine learning evolutionary and hybrid systems communities who will provide their views on how these different intelligent technologies have contributed and will contribute to creation of smart adaptive systems of the future
