Bluebeard's Goat and Other Stories H. L. Mencken,2012-12-04 H L Mencken in his illustrious career as a journalist made his reputation with satirical writing and controversial ideals Although his is a name not customarily associated with short fiction it was his first literary love From 1900 to 1919 he published nearly 60 stories and short shorts sometimes pseudonymously Here for the first time 30 of Mencken s thoroughly entertaining stories are collected showcasing Mencken s wit and skill in a medium for which he is not well known Meet a bumbling anarchist newspaper editor the Charmed Circle of Long Island in a story strikingly prescient of F Scott Fitzgerald a shop owner whose mannequins belie a horrific secret and a pair of wily entrepreneurs working in the Caribbean among plenty of other excellent amusing and memorable stories Superb clever or hilarious use of language Read *Epithalamium* a sendup of the social rigmarole of marriage for its exquisite choice of words or the Poe esque *The Window of Horrors* about a clothier and his obsession with life like mannequins for its chills For quintessential Mencken read *The Man of God* whose lowly grocer becomes an evangelist Publishers Weekly *The Age of Smoke* Frank Uekötter,2009-02-15 In 1880 coal was the primary energy source for everything from home heating to industry Regions where coal was readily available such as the Ruhr Valley in Germany and western Pennsylvania in the United States witnessed exponential growth yet also suffered the greatest damage from coal pollution These conditions prompted civic activism in the form of anti smoke campaigns to attack the unsightly physical manifestations of coal burning This early period

witnessed significant cooperation between industrialists government and citizens to combat the smoke problem It was not until the 1960s when attention shifted from dust and grime to hazardous invisible gases that cooperation dissipated and protests took an antagonistic turn The Age of Smoke presents an original comparative history of environmental policy and protest in the United States and Germany Dividing this history into distinct eras 1880 to World War I interwar post World War II to 1970 Frank Uekoetter compares and contrasts the influence of political class and social structures scientific communities engineers industrial lobbies and environmental groups in each nation He concludes with a discussion of the environmental revolution arguing that there were indeed two environmental revolutions in both countries one societal where changing values gave urgency to air pollution control the other institutional where changes in policies tried to catch up with shifting sentiments Focusing on a critical period in environmental history The Age of Smoke provides a valuable study of policy development in two modern industrial nations and the rise of civic activism to combat air pollution As Uekoetter s work reveals the cooperative approaches developed in an earlier era offer valuable lessons and perhaps the best hope for future progress
