Smoking Paul Slovic, 2001-05-23 This important book reveals why the young start smoking and why

as adults they regret having started It is a great contribution to helping end a national epidemic CHERYL HEALTON

President CEO American Legacy Foundation This book is a must for everyone concerned about how to address the problem of tobacco use among young people Virtually all new smokers are children Many of them are in their early teens and one out of every three children who begin to smoke will die prematurely because of their use of tobacco This book includes the most objective thorough and authoritative research to date on the critical question about whether young people fully understand the consequences of their decision to smoke at the time they start and whether they are able to make rational decisions about this vitally important decision It leaves the reader with no doubt about the value of efforts to better educate our young people and to empower them to resist the lure of tobacco marketing MATTHEW MYERS President Campaign for Tobacco Free Kids

Do individuals really know and understand the risks entailed by their smoking decisions The question is particularly important in the case of young persons because most smokers start during childhood and adolescence After years of intense publicity about the damages of smoking it is generally believed that every teenager and adult in the U S knows that smoking is dangerous to health thus decisions to smoke are informed choices This book presents a counter view based on a survey of several thousand young persons and adults probing attitudes beliefs feelings and perceptions of risk associated with smoking The authors agree that young smokers give little or no thought to health risks or the problems of addiction The survey data contradicts the model of informed rational choice and underscores the need for aggressive policies to counter tobacco firms marketing and promotional efforts and to restrict youth access to tobacco *Smoking Prevention and Cessation* Mirjana
