IARC Monographs on the Evaluation of Carcinogenic Risks to Humans World Health Organization, IARC Working Group on the Evaluation of Carcinogenic Risks to Humans, 2000 *Betel-quid and Areca-nut Chewing and Some Areca-nut-derived Nitrosamines* IARC Working Group on the Evaluation of Carcinogenic Risks to Humans, International Agency for Research on Cancer, 2004 A working group of sixteen experts from seven countries re-evaluated the evidence of the carcinogenicity of betel quid and areca nut chewing and some areca nut related nitrosamines Betel quid and areca nut chewing are widely practised in many parts of Asia and in Asian migrant communities elsewhere in the world There are hundreds of millions of users worldwide They evaluated betel quid with tobacco as carcinogenic to humans Group 1 on the basis of sufficient evidence of an increased risk of cancer of the oral cavity pharynx and oesophagus The working group reviewed epidemiological studies of human cancer mainly studies from India Pakistan and Taiwan China Studies on betel quid with tobacco and areca nut with tobacco in experimental animals now also provide sufficient evidence of carcinogenicity The working group also evaluated betel quid without tobacco as carcinogenic to humans Group 1 on the basis of sufficient evidence of an increased risk of oral cancer Studies on betel quid without tobacco and areca nut without tobacco in experimental animals now also provide sufficient evidence of carcinogenicity Areca nut a common ingredient of betel quid and many different chewing preparations including those available commercially has been observed to cause oral submucous fibrosis Some Drinking-water Disinfectants and Contaminants, Including Arsenic IARC Working Group on the Evaluation of Carcinogenic Risks to Humans, International Agency for Research on Cancer, 2004 A working group of 23 experts from 13 countries met in Lyon to evaluate the evidence for carcinogenicity of arsenic mostly naturally occurring as a contaminant of drinking water and of the water disinfectant chloramine The working group also evaluated or re-evaluated four chlorination by-products found in drinking water namely chloral hydrate di- and trichloroacetic acids and 3-chloro-4-dichloromethyl-5-hydroxy-2,5H-furanone also known as MX High level exposure to arsenic in drinking water occurs in some regions such as China Latin America Bangladesh and West Bengal The Working Group reviewed epidemiological studies of human cancer mainly ecological studies in Taiwan and Chile and several case control and cohort studies in relation to arsenic in drinking water Arsenic in drinking water primarily inorganic as arsenate and to a lesser extent arsenite was evaluated as carcinogenic to humans Group 1 on the basis of sufficient evidence for an increased risk for cancer of the urinary bladder lung and skin Studies on inorganic arsenic in experimental animals provided limited evidence for its carcinogenicity but sufficient evidence was found in experimental animals for the carcinogenicity of dimethylarsinic acid an organic form of arsenic which produced urinary bladder tumours in rats and lung tumours in mice after oral administration **Some Traditional Herbal**

Medicines, Some Mycotoxins, Naphthalene and Styrene IARC Working Group on the Evaluation of Carcinogenic Risks to Humans, International Agency for Research on Cancer, 2002 This monograph evaluates the carcinogenic risks to humans posed by the use of some traditional herbal medicines fumonisin B1 and the industrial organic chemicals naphthalene and styrene and provides an update of the data on the carcinogenicity of aflatoxin B1 Carcinogenesis Abstracts, 1977

Plastics, Rubber and Health Guneri Akovali, 2007 In recent years there have been certain scare stories about the possible negative effects on human health from some of these materials However today it is realised that it is often not the polymers themselves but their monomers or the additives used that are responsible for these negative effects And the reality is that a lot of polymers are used in medical applications without adverse effects on patients Hence the dividing line between whether something is toxic and harmful to health or not and if it is under what conditions is a very critical issue and therefore there needs to be a better understanding of these systems This book presents the available information on the eternal triangle of plastics and rubber and health to enable a better understanding of the facts Toxicologic Assessment of Jet-Propulsion Fuel 8 National Research Council, Division on Earth and Life Studies, Board on Environmental Studies and Toxicology, Committee on Toxicology, Subcommittee on Jet-Propulsion Fuel 8, 2003-02-14 This report provides a critical review of toxicologic epidemiologic and other relevant data on jet propulsion fuel 8 a type of fuel in wide use by the U S Department of Defense DOD and an evaluation of the scientific basis of DOD's interim permissible exposure level of 350 mg m³

Metabolism of Drugs and Other Xenobiotics Pavel Anzenbacher, Ulrich M. Zanger, 2012-05-29 A practice oriented desktop reference for medical professionals toxicologists and pharmaceutical researchers this handbook provides systematic coverage of the metabolic pathways of all major classes of xenobiotics in the human body The first part comprehensively reviews the main enzyme systems involved in biotransformation and how they are orchestrated in the body while parts two to four cover the three main classes of xenobiotics drugs natural products environmental pollutants The part on drugs includes more than 300 substances from five major therapeutic groups central nervous system cardiovascular system cancer infection and pain as well as most drugs of abuse including nicotine alcohol and designer drugs Selected well documented case studies from the most important xenobiotics classes illustrate general principles of metabolism making this equally useful for teaching courses on pharmacology drug metabolism or molecular toxicology Of particular interest and unique to this volume is the inclusion of a wide range of additional xenobiotic compounds including food supplements herbal preparations and agrochemicals Sampling and Analysis of Environmental Chemical Pollutants E. P. Popek, 2017-12-05 Sampling and

Analysis of Environmental Chemical Pollutants A Complete Guide Second Edition promotes the knowledge of data collection fundamentals and offers technically solid procedures and basic techniques that can be applied to daily workflow solutions. The book's organization emphasizes the practical issues facing the project scientist. In focusing the book on data collection techniques that are oriented toward the project objectives, the author clearly distinguishes the important issues from the less relevant ones. Stripping away the layers of inapplicable or irrelevant recommendations, the book centers on the underlying principles of environmental sampling and analytical chemistry and summarizes the universally accepted industry practices and standards. This Guide is a resource that will help students and practicing professionals alike better understand the issues of environmental data collection, capitalize on years of existing sampling and analysis practices, and become more knowledgeable and efficient in the task at hand. The three phases of environmental chemical data collection: planning, implementation, and assessment, are explained in a logical and concise manner. A discussion on the physical and chemical properties of environmental chemical pollutants promotes the understanding of their fate and transport. A chapter on common analytical chemistry techniques, methods of compound quantitation, and laboratory quality control and quality assurance may be used as a standalone introduction to instrumental analytical chemistry. Eleven case studies demonstrate the application of the Data Quality Objectives process to the development of sampling designs and illustrate specific data interpretation problems. Numerous call out boxes in each chapter offer practical tips on widely used industry practices which originate from years of experience in the field. Appendices contain the most frequently used action levels and reference material, calculation aides, and useful field forms and checklists. Authored by an analytical chemist and environmental pollutant expert with more than 30 years of experience in research and industry.

Report on Carcinogens (12th Ed.) Nat. Toxicology Program (NTP) (NIH), 2011-10-08. The Report on Carcinogens RoC is a congressionally mandated science based public health document that identifies and discusses agents, substances, mixtures, or exposure circumstances hereinafter referred to as substances that may pose a hazard to human health by virtue of their carcinogenicity. For each listed substance, the report contains a substance profile which provides information on: 1) the listing status; 2) cancer studies in humans and animals; 3) studies of genotoxicity, ability to damage genes, and biologic mechanisms; 4) the potential for human exposure to these substances; and 5) Federal regulations to limit exposures. Eight substances have been added to this 12th ed of the report which now includes 240 listings. The industrial chemical formaldehyde and a botanical known as aristolochic acids are listed as known human carcinogens. Six other substances: captafol, cobalt, tungsten carbide in powder or hard metal form, certain inhalable glass wool fibers, o-nitrotoluene, riddelliine, and styrene are added as substances that are reasonably anticipated to be human carcinogens.
